Strategy innovation is the capacity to reconceive the existing industry model in ways that create new value for customers, wrong-foot competitors, and produce new wealth for all stakeholders.1 Strategy innovation is the only way for newcomers to succeed in the face of enormous resource disadvantages, and the only way for incumbents to renew their lease on success.

In this bestselling classic of financial management, G. Bennett Stewart, III, raises and answers these provocative questions: Do dividends matter? Are earnings per share really accurate measures of corporate performance? What is the engine that really drives share prices? More than that, Stewart lays the foundation for EVAr, the financial management and incentive system now in place at nearly 300 companies around the world, and which is rapidly becoming the global standard for corporate governance. Managers, confused about what investors really want, often find it difficult to reach informed decisions regarding business strategy, acquisitions and divestitures, financial structure, dividend policy, and executive compensation. But now an EVAr -based revolution is providing a practical framework that managers can use to build a premium-valued company. At the forefront of this revolution is the consulting firm of Stern Stewart & Co., of which G. Bennett Stewart, III, author of The Quest for Value, is senior partner and cofounder. The Quest for Value is written for senior management, key operating people, and planning and financial staff. This bible of financial management will assist managers in goal setting, resource allocation, strategy development, valuation of acquisitions, financial policy setting, incentive compensation planning, and building shareholder value. The Quest for Value cuts sharply through the myths that to this day misinform corporate strategists in their pursuit of shareholder value. Laying waste to inaccurate yet widely used methods of performance, Stewart demonstrates how the Stern Stewart EVAr approach not only creates greater shareholder value but also provides a powerful framework for the broadest range of corporate decision making.

What happens when a young Wall Street investment banker spends a small fortune to have lunch with Warren Buffett? He becomes a real value investor. In this fascinating inside story, Guy Spier details his career from Harvard MBA to hedge fund manager. But the path was not so straightforward. Spier reveals his transformation from a Gordon Gekko wannabe, driven by greed, to a sophisticated investor who enjoys success without selling his soul to the highest bidder. Spier's journey is similar to the thousands that flock to Wall Street every year with their shiny new diplomas, aiming to be King of Wall Street. Yet what Guy realized just in the nick of time was that the King really lived 1,500 miles away in Omaha, Nebraska. Spier determinedly set out to create a new career in his own way. Along the way he learned some poverful lessons which include: why the right mentors and partners are critical to long term success on Wall Street; why a topnotch education can sometimes get in the way of your success; that real learning doesn't begin until you are on your own; and how the best lessons from Warren Buffett have less to do with investing and more to do with being true to yourself. Spier also reveals some of his own winning investment strategies, detailing deals that were winners but also what he learned from deals that went south. Part memoir, part Wall Street advice, and part how-to, Guy Spier takes readers on a ride through Wall Street but more importantly provides those that want to take a different path with the insight, guidance, and inspiration they need to carve out their own definition of success.

No new book on Plato can surprise Plato scholars. For there is nothing new under the sun, nor inside the cave. We have grown complacent in our preconceptions of Plato, habitually adopting the web of belief that comes with the canonical corpus. Yet it is not the web itself that stands in the way of progress, but the tendency to adopt it without question. Rethinking Plato is, as the subtitle suggests, a Cartesian quest for the real Plato. What makes it Cartesian is that it looks for Plato independently of the prevailing paradigms on where we are supposed to find him. The result of the quest is a complete pedagogical platform on Plato. This does not mean that the book leaves nothing out, covering all the dialogues and all the themes, but that it provides the full intellectual apparatus for doing just that. It consists of two parts. The first is a general orientation in three chapters, one each pertaining to the life, thought, and works of Plato. The second is a dialogic companion covering the four dialogues built around the last days of Socrates, with a separate chapter devoted to each: Euthyphro, Apology, Crito, and Phaedo.

Explores fundamental philosophical and scientific questions about the nature of life, particularly in relation to the search for extraterrestrial life.

Diana Lobel takes readers on a journey across Eastern and Western philosophical and religious traditions to discover a beauty and purpose at the heart of reality that makes life worth living. Guided by the ideas of ancient thinkers and the insight of the philosophical historian Pierre Hadot, The Quest for God and the Good treats philosophy not as an abstract, theoretical discipline, but as a living experience. For centuries, human beings have struggled to know why we are here, whether a higher being or dimension exists, and whether our existence is fundamentally good. Above all, we want to know whether the search for God and the good will bring happiness. Following in the path of the ancient philosophers, Lobel directly connects conceptions of God or an Absolute with notions of the good, illuminating diverse classical texts and thinkers. She explores the Bible and the work of Plato, Aristotle, Augustine, Maimonides, al-Farabi, and al-Ghazali. She reads the Tao Te Ching, I Ching, Bhagavad Gita, and Upanishads, as well as the texts of Theravada, Mahayana, and Zen Buddhism, and traces the repercussions of these works in the modern thought of Alfred North Whitehead, Iris Murdoch, Alasdair MacIntyre, and Charles Taylor. While each of these texts and thinkers sets forth a distinct and unique vision, all maintain that human beings find fulfillment in their contact with beauty and purpose. Rather than arriving at one universal definition of God or the good, Lobel demonstrates the aesthetic value of multiple visions presented by many thinkers across cultures. The Quest for God and the Good sets forth a path of investigation and discovery culminating in intellectual and spiritual communion.

Where have all the heroes gone? Men today feel increasingly weak and impotent as women challenge them in every field. What can men do about this? Are they headed for total emasculation? Or are we facing the battle of the sexes? Revealing the true nature of masculinity, Toltec seer Thé un Mares shows men how to get back in touch with the essential core of their maleness -- a core that is nothing less than the mysterious, magical and untapped power of creativity. This is both a message of hope and a guidebook for every man who wants to find his way as a male and walk tall in the world today.

#1 NEW YORK TIMES BESTSELLER - A timely and important book that challenges everything we think we know about cultivating true belonging in our communities, organizations, and culture, from the #1 bestselling author of Rising Strong, Daring Greatly, and The Gifts of Imperfection Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! REESE'S BOOK CLUB PICK "True belonging doesn't require us to change who we are. It requires us to be who we are." Social scientist Brené Brown, PhD, MSW, has sparked a global conversation about the experiences that bring meaning to our lives--experiences of courage, vulnerability, love, belonging, shame, and empathy. In Braving the Wilderness, Brown redefines what it means to truly belong in an age of increased polarization. With her trademark mix of research, storytelling, and honesty, Brown will again change the cultural conversation while mapping a clear path to true belonging. Brown argues that we're experiencing a spiritual crisis of disconnection, and introduces four practices of true belonging that challenge everything we believe about ourselves and each other. She writes, "True belonging requires us to believe in and belong to ourselves so fully that we can find sacredness both in being a part of something and in standing alone when necessary. But in a culture that's rife with perfectionism and pleasing, and with the erosion of civility, it's easy to stay quiet, hide in our ideological bunkers, or fit in rather than show up as our true selves and brave the wilderness of uncertainty and criticism. But true belonging is not something we negotiate or accomplish with others; it's a daily practice that demands integrity and authenticity. It's a personal commitment that we carry in our hearts." Brown offers us the clarity and courage we need to find our way back to ourselves and to each other. And that path cuts right through the wilderness. Brown writes, "The wilderness is an untamed, unpredictable place of solitude and searching. It is a place as dangerous as it is breathtaking, a place as sought after as it is feared. But it turns out to be the place of true belonging, and it's the bravest and most sacred place you will ever stand."
