technology it powers,  
Paul R. Josephson  
explores the political,  
environmental, and  
public health issues  
surrounding one of  
America's most  
dangerous pastimes.  
Each chapter tells the  
story of an ecosystem  
within the United  
States and the  
devices that wreak  
havoc on it—personal

watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia.

In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the

legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental

manufacturers,  
Josephson's  
compelling history  
leads to one  
irrefutable conclusion:  
these machines  
cannot be operated  
without loss of life and  
loss of habitat.

outboard and SAVE  
\$1000 or more  
compared to buying a  
new motor! With a  
little know-how and a  
few common tools,  
you can fix an old  
motor—bring it back  
from the dead.

Sometimes all it takes  
is a squirt of WD-40  
into the cylinder and a  
new spark plug. Or a  
new set of points and

condensers—which do not require expert knowledge or black magic to install.

Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you

exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours’

work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You'll learn how they work,

and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will
