The 97 Mach Z is on the F-chassis and is the first year for the SC-10 rear skid in the Mach. I believe the center crank bearing can be an issue ,but with 4000km's you should still have some good life left in the motor if it was always well looked after. My buddy had one with Jaws pipes and clutched. It worked really good and was pretty reliable too.

1997 skidoo mach z 809cc

The 800 Mach Z engine has finally been refined into an excellent trail engine with its increased water capacity and nickicil bore. With these improvement from Rotax it picked up an extra 20cc which is about 6-7 HP. We have a head cut that will use a thicker base gasket which will raise up the port timing instead of doing expensive porting work for trail use.
