Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America’s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede’s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid’s, handle like a pro’s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension’s condition. He outlines testing procedures that will help you gauge how well you’re improving your suspension, along with your riding. And, if you’re inclined to perfect your bike’s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

YZ250 1994-1998

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There’s just one problem: most of these solutions are making things worse. Creativity isn’t produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we’re told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

An action-packed series-starter perfect for fans of The Heroine Complex and Not Your Sidekick. “I didn’t know how much I needed this brave, thrilling book until it rocked my world. Dreadnought is the superhero adventure we all need right now.”—Charlie Jane Anders, author of All the Birds in the Sky Danny Tozer has a problem: she just inherited the powers of Dreadnought, the world’s greatest superhero. Until Dreadnought fell out of the sky and died right in front of her, Danny was trying to keep people from finding out she’s transgender. But before he expired, Dreadnought passed his mantle to her, and those secondhand superpowers transformed Danny’s body into what she’s always thought it should be. Now there’s no hiding that she’s a girl. It should be the happiest time of her life, but Danny’s first weeks finally living in a body that fits her are more difficult and complicated than she could have imagined. Between her father’s dangerous obsession with “curing” her girlhood, her best friend suddenly acting like he’s entitled to date her, and her fellow superheroes arguing over her place in their ranks, Danny feels like she’s in over her head. She doesn’t have time to adjust. Dreadnought’s murderer—a cyborg named Utopia—still haunts the streets of New Port City, threatening destruction. If Danny can’t sort through the confusion of coming out, master her powers, and stop Utopia in time, humanity faces extinction.

SUNDAY TIMES BESTSELLER Some people are born to be a certain thing. And I was a born fighter. At the age of eight, Michael Bisping began his training in martial arts. By the time he was 15, he was fighting in his first no holds barred competition. When he turned professional and joined the UFC he was sure about one thing: only a world championship title would do. A British underdog in the greatest fighting championship on earth, he spent the next decade winning some of the championship’s most sensational contests to achieve his dream, becoming the first ever British UFC world champion in 2016. From his boyhood years learning to fight in the gyms of Lancashire to his most shocking clashes in the cage, in Quitters Never Win Bisping tells the raw and unfiltered story behind his legendary career for the first time, including his greatest wins, his fiercest rivals and the harrowing injury that forced him into retirement. As audacious, entertaining and as candid as the man himself, it’s a backstage pass to one of the world’s most extreme sports and an unbridled account of what it really takes to become a champion, from sleeping in his own car to reaching the summit of the world’s fastest growing sport.

Elegant and unique geometric design coloring book for adults with 20 illustrations! Say it with patterns! Black and white seamless geometric patterns! This is a great book for those who enjoy coloring patterns. One image per page, so you can color with pencils, pens or markers without the colors bleeding into other images.

Provides a single reference that integrates community planning, business planning and tourism planning, from a global and Australian perspectives. It’s an important text for the many courses that incorporate aspects of community tourism into their business, tourism, social science, and art programs. Beeton from La Trobe.
