Shiver DC problems

Ok, so i bought a pair of shiver dc's, in "amazing condition" \*cough

cough\*, bolted them on

to my bike everything

felt good apart from a

small knock when the

wheel came of the

ground then landed

again ( no noise on a

compression where the

wheel stayed in contact with the ground), the noise similar to that of a loose headset.

to revive my Marzocchi Shiver DC from 2003. It has been standing around since I quit my downhill/freeride career 11 years ago. But now its time to start again. For starters I will give you the condition of the fork, explain what my plan is and then ask a few questions.
