Petrol goes off after only a few weeks and engine performance will drop. 2-stroke engines are lubricated by having the 2-stroke oil mixed in with petrol. It is important that this mix is done carefully as an incorrect ratio can lead to engine problems.

Always check the manufacturer's guidelines in the

Two stroke fuel is basically unleaded petrol mixed with 2 stroke oil. The oil to fuel mix ratio should be specified in your engines instruction manual. The oil in 2 stroke fuel is extremely important in lubricating your engine as two stroke engines do not have an internal oil reservoir. Without the

differs from a 4 stroke petrol engine by the way it generates power in the number of revolutions of the crankshaft.

Unlike in a 4 stroke petrol engine, the 2 stroke spark ignition cycle produces power in each of its revolutions.

The 2 stroke spark ignition gives way to the traditional four strokes to run its complete
