[MOBI] V6 Engine Sensor Locations Pictures And Diagrams

Had a "C" 3800 completely apart some time ago and only remember one coolant temperature sensor, the one under the throttle assembly. Might be a level sensor on the radiator but not at home as usual. Is also an intake air temperature sensor in the air cleaner assembly.

3800 series 1 temperature sending unit location??? - Buick ...

The IAC valve controls the amount of air that bypasses the throttle plate, and is used to control the idle speed of the engine. It comprises a plunger that fits within a bore of the throttle body, and a stepper motor that moves the plunger. The PCM uses the engine's RPM and MAP sensor values to control position of the plunger.

Cleaning the Idle Air Control (IAC)... - GM 3800 Service ...

The Buick V6, popularly referred to as the 3800 in its later incarnations, originally 198 cu in (3.2 L) and initially marketed as Fireball at its introduction in 1962, was a large V6 engine used by General Motors. The block is made of cast iron and all use two-valve-per-cylinder iron heads, actuated by pushrods. The engine, originally designed and manufactured in the United States, was also ...

Buick V6 engine - Wikipedia

The check engine light (CEL) will be illuminated on your instrument cluster. The diagnostic trouble codes (DTCs) lighting up the CEL usually are: P0131 Upstream Heated Oxygen Sensor (HO2S11) Circuit Out Of Range Low Voltage (Bank 1). P0132 Upstream Heated Oxygen Sensor (HO2S11) Circuit High Voltage (Bank 1, Sensor 1).
