According to this bestselling author, diabetes is not a disease; in the vast majority of cases, it is a complex mechanism of protection or survival that the body chooses to avoid the possibly fatal consequences of an unhealthy diet and lifestyle. Despite the body's ceaseless self-preservation efforts (which we call diseases), millions of people suffer or die unnecessarily from such consequences. The imbalanced blood sugar level in diabetes is but a symptom of illness, not the illness itself. By developing diabetes, the body is neither doing something wrong nor is it trying to commit suicide. The current diabetes epidemic is man-made, or rather, factory-made, and, therefore, can be halted and reversed through simple but effective changes in diet and lifestyle. Diabetes - No More provides you with essential information on the various causes of diabetes and how anyone can avoid them. To stop the diabetes epidemic we need to create the right circumstances that allows the body to heal. Just as there is a mechanism to become diabetic, there is also a mechanism to reverse it. Find out how!

The Haunted Life is the coming-of-age story of Peter Martin, a college track star determined to idle away what he knows will be one of his last innocent summers in his tranquil New England home town. But with the war escalating in Europe and his two closest friends both plotting their escapes, he realises how sheltered his upbringing has been. As he surveys the competing influences of his youth, he struggles to determine what might lead to an intellectually authentic life. The Haunted Life is ultimately a meditation on intellectual truth, male friendship and the desire for movement - all themes that would dominate Kerouac's later work.
