Aging | Boundless
Sociology*

Today, most scientists think that aging is caused by a complex interplay of different factors, including genetics, programmed physiological changes to our cells, and behavioral and environmental influences. Much of this process is unavoidable.

Where To Download

In a sense, our cells are "coded" to die off as time passes. For example, consider the role of telomeres.

Aging is one of the important social issues that society should be concerned about. Aging refers to the gradual changes that happen with time in the life of an individual (Kaplan, 2006, p. 196). A multifaceted process

Where To Download

involves changes in terms of psychological, physical, and social changes.

Mcpherson

Aging as a Social Process - 978 Words | Report Example

Although social aging can differ from one individual to another, it is also profoundly influenced by the perception of aging that

Where To Download

is part of a society's culture. If a society views aging positively, the social aging experienced by individuals in that society will be more positive and enjoyable than in a society that views aging negatively.
