In this manual, you as a pilot, will learn about main flight concepts and how the A320 works during normal and abnormal operations. This is not a technical manual about systems, it's a manual about of flight philo- sophy. This manual is based on the original Airbus manual called "The Flight Crew Training Manual" which is published as a supplement to the Flight Crew Operating Manual (FCOM) and is designed to provide pilots with practical information on how to operate the Airbus aircraft. It should be read just like a supplement and not for real flight. In this case refer to the original FCOM from Airbus. Let's start to fly the amazing A320 with our collection of books and re- member, it's not a technical manual so enjoy it!

This is a 400 page 6 X 9 inch Black and White paperback version of Captain Mike Ray's "Unofficial Airbus 320 Series manual". This document is presented as a less expensive version of that document. And while it incorporates all of the features and information, it is lacks the beautiful color and lay-flat characteristics of the original document.

If you are either an Airbus-driver or a serious flight simmer, this collection of information is something that should pique your interest. Learning to understand and operate one of the world's most complex machines is a tall request from a simple book like this ... and Captain Mike Ray is up to the task. His treatment of the airplane systems and operational techniques is written in an interesting and entertaining way ... and makes learning the difficult and complex ... well, almost easy. This over 400 page document is lavishly illustrated in full color to take advantage of the increased learning potential in the use of color. There can be no doubt that the Airbus A320 is a color driven systems airplane and this book attempts to take full advantage of the use of color in describing and illustrating the operations of the airplane systems and controls. Whatever price penalty is incurred in the purchasing of this color volume is well worth the investment in increased learning potential.

Welcome to the most complete manual about the MCDU operations based on the FMS system of the great A320. This manual describes all functions of the MCDU (Multi-Function Control and Display Unit) for Airbus A320 including definitions, normal operations and abnormal ope- rations in real flights. Learn all about each part of the MCDU, each key, each function and every detail you need as a pilot. After learning the all theory concepts, you will learn to operate the MCDU in different flights, including domestic flights, international flight and abnormal flights with emergencies. At the end of this book, you will be ready for operating the MCDU like a professional pilot.

Provides a Comprehensive Introduction to Aircraft Design with an Industrial Approach This book introduces readers to aircraft design, placing great emphasis on industrial practice. It includes worked out design examples for several different classes of aircraft, including Learjet 45, Tucano Turboprop Trainer, BAe Hawk and Airbus A320. It considers performance substantiation and compliance to certification requirements and market specifications of take-off/landing field lengths, initial climb/high speed cruise, turning capability and payload/range. Military requirements are discussed, covering some aspects of combat, as is operating cost estimation methodology, safety considerations, environmental issues, flight deck layout, avionics and more general aircraft systems. The book also includes a chapter on electric aircraft design along with a full range of industry standard aircraft sizing analyses. Split into two parts, Conceptual Aircraft Design: An Industrial Approach spends the first part dealing with the pre-requisite information for configuring aircraft so that readers can make informed decisions when designing vessels. The second part devotes itself to new aircraft concept definition. It also offers additional analyses and design information (e.g., on cost, manufacture, systems, role of CPD, etc.) integral to conceptual design study. The book finishes with an introduction to electric aircraft and futuristic design concepts currently under study. Presents an informative, industrial approach to aircraft design Features design examples for aircraft such as the Learjet 45, Tucano Turboprop Trainer, BAe Hawk, Airbus A320 includes a full range of industry standard aircraft sizing analyses Looks at several performance substantiation and compliance to certification requirements Discusses the military requirements covering some combat aspects Accompanied by a website hosting supporting material Conceptual Aircraft Design: An Industrial Approach is an excellent resource for those designing and building modern aircraft for commercial, military, and private use.

This iPad interactive book is an indispensable tool for pilots seeking the Airbus A320 type rating. This study guide offers an in-depth systems knowledge with pictures, videos and schematics not found in other publications. It is packed with detailed and useful information to prepare any candidate for command and responsibility of the A320 equipped with IAE or CFM engines.

Welcome to the most advanced version of the HDIW collection! In this edition, we will know all the abnormal operation of one of the most sold and flown commercial aircraft in the commercial aviation. We will know everything about the fabulous Airbus 320. We will learn the abnor- mal operation of the main systems of the airplane. How each of them works and how they are operated by the pilots from the control panels in the cockpit. A practical guide, didactic and entertaining for any profesio- nal who is about to start flying A320 or for any professional who wants to expand their frontiers of knowledge! This edition of the most presti- gious collection in Latin America promises to mark the difference in the way of learning the systems of an airplane.

Whether you're searching for drugs or a missing person, K9 Scent Training will improve your K9 team's capabilities in the field. Use proven techniques to train your dog for: Scent identification line-ups to indicate a scent connection between crime-scene evidence and a suspect. Tracking along a wide variety of track types, including the cold track, the broken-off track and tracks that run over or under cross-tracks. Detection work for searches in buildings, vehicles, open terrain and more. In this must-have guide for SAR teams and police K9 trainers and handlers, Dr. Resi Gerritsen and Ruud Haak present everything you need to know to build or improve a scent training program. Scent training involves high-stakes work, and in the case of a search for a missing person, the right training for your K9 can mean the difference between life and death. Beginning with the science behind odors and how dogs perceive them, Resi and Ruud show you how to harness that knowledge to eliminate training problems and maximize your dog's potential. You'll learn how to start scent training for young dogs using simple exercises before building up to more complex training. Finally, using techniques they've perfected over decades, Resi and Ruud share their specialized, step-by-step programs for advanced scent identification training and tracking. Learning about an aircraft seems to have no end, a thought very close to reality when it comes to complex aircraft. Pilots spend much of their lives, training their flight techniques in a certain aircraft, learning its systems and its operations. The collection of A320 offered by the aeronautical library, is the most complete guide on all the knowledge that a pilot must learn about this wonderful aircraft. This new edition covers all the topics related to the understanding of the QRH (Quick Reference Handbook), its content and its correct way of using it. The QRH of an aircraft, is its quick reference manual, where the pilot can consult about normal and abnormal procedures, use performance tables, know limitations of the aircraft and everything related to the successful operation of the A320. A new contribution to the most complete A320 collection in Spanish on the market.
