take a passenger along for the ride. Just remember that with a two-place aircraft, you will be flying under GA Rules (Part 61 & 91).

## Best Ultralight Aircraft for the Money 2020 – PilotMall.com

Ultralight helicopters look very similar to “ regular ” helicopters, except that they are built lighter with a much simple construction. They usually have one or two seats, and no cockpit. On most of these helicopters, the diameter for the top rotor goes from 12 to 25 feet. They might not be able to fly as high or as fast as a regular helicopter, not to mention a limited range and load capacity, but it is important to keep in mind that they are fully functional helicopters, and not anyone ...

## What You Need to Know About

### Ultralight Helicopters – Rotor ...

Ultralights. Ultralight flying represents one of the fastest and purest ways to experience the joys of aviation. From powered-parachutes and trikes to traditional fixed wings and even amphibians and rotorcraft, ultralights are fun, exciting, and in most cases, remarkably affordable. Flying ultralights is not a step up or down, but a step into a completely different and exciting sector of the flying community.

### Ultralights & Ultralight Aircraft | EAA

The new Mosquito XE is the same as the original Mosquito but with the open frame tubing replaced with an all fiberglass airframe. The Mosquito XE Ultralight Helicopter airframe is a unibody construction made entirely of
