In this lesson, students read about how animals adapt to their environment. We read about bird beaks and other adaptations. We also learned that an animal's body color and shape can help them survive. Below are some helpful files to look at (notes, vocabulary words, study guide):

## Chapter 2 - Animal Growth and Adaptations

Many different animals have adaptations that protect them from predators. Some of these adaptations are behavioral, allowing them to act a certain way to avoid being seen by a predator. For example, sloths move very slowly through trees making them hard to spot. Their long, hairy bodies have algae growing on them to blend in with the trees.
