This third edition of this text presents the major grammatical contrasts between English and Spanish in a simple and direct manner that is ideal for teachers of either language. This book addresses difficult grammatical topics for the English speaker, such as the question of aspect (preterit/imperfect) and the Spanish rorindicative/subjunctive; the English modal auxiliary system; and other challenging topics for the Spanish speaker. This reworked and expanded edition presents a complete inventory of all the major inter-lingual contrasts, emphasizing those contrasts that pose difficulties for teachers and students alike. The text features numerous exercises and, new with this edition, an extensive glossary of grammatical terms. A visionary game designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world-from social problems like depression and obesity to global issues like poverty and climate change-and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, Reality Is Broken shows that the future will belong to those who can understand, design, and play games. Jane McGonigal is also the author of SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More Resilient.

Dr. Gunter Pauli is challenging the green movement he has been so much a part of to do better, to do more. He is the entrepreneur who launched Ecover; those products are probably in many of your homes. He built the largest ecologically-sound factory in the world. His participation in the Club of Rome and the founding of Zero Emissions Research Institute (ZERI) has made an immense contribution to sustainability both in terms of research, public awareness and articulating a visionary direction. He has dedicated himself to teaching and the hands-on implementation of projects that have brought healthy environments, good nutrition, health care and jobs in sustainable commerce to a myriad of places in the world.

“Suzan-Lori Parks is one of the most important dramatists America has produced.”–Tony Kushner “The plan was that no matter what I did, how busy I was, what other commitments I had, I would write a play a day, every single day for a year. It would be about being present and being committed to the artistic process every single day, regardless of the ‘weather.’ It became a daily meditation, a daily prayer celebrating the rich and strange process of a writing life.”–Suzan-Lori Parks On November 13, 2002, the incomparable Suzan-Lori Parks got an idea to write a play every day for a year. She began that very day, finishing one year later. The result is an extraordinary testament to artistic commitment. This collection of 365 impeccably crafted pieces, each with its own distinctive characters and dramatic power, is a complete work by an artist responding to her world, each and every day. Parks is one of the American theater’s most wily and innovative writers, and her “stark but poetic language and fiercely idiosyncratic images transform her work into something haunting and marvelous” (TIME).

Alexander III was one of the most important popes of the Middle Ages and his papacy (1159-81) marked a significant watershed in the history of the Western Church and society. This book provides a long overdue reassessment of his papacy and his achievements, bringing together thirteen essays which review existing scholarship and present the latest research and new perspectives. Individual chapters cover topics such as Alexander's many contributions to the law of the Church, which had a major impact upon Western society, notably on marriage, his relations with Byzantium, and the extension of papal authority at the peripheries of the West, in Spain, Northern Europe and the Holy Land. But dominant are the major clashes between secular and spiritual authority: the confrontation between Henry II of England and Thomas Becket after which Alexander eventually secured the king's co-operation and the pope's eighteen-year conflict with the German emperor, Frederick I. Both the papacy and the Western Church emerged as stronger institutions from this struggle, largely owing to Alexander's leadership and resilience: he truly mastered the art of survival.

The Maximalist Novel sets out to define a new genre of contemporary fiction that developed in the United States from the early 1970s, and then gained popularity in Europe in the early twenty-first century. The maximalist novel has a very strong symbolic and morphological identity. Ercolino sets out ten particular

elements which define and structure it as a complex literary form: length, an encyclopedic mode, dissonant chorality, diegetic exuberance, completeness, narratorial omniscience, paranoid imagination, inter-semiocity, ethical commitment, and hybrid realism. These ten characteristics are common to all of the seven works that centre his discussion: Gravity's Rainbow by Thomas Pynchon, Infinite Jest by David Foster Wallace, Underworld by Don DeLillo, White Teeth by Zadie Smith, The Corrections by Jonathan Franzen, 2666 by Roberto Bolaño, and 2005 dopo Cristo by the Babette Factory. Though the ten features are not all present in the same way or form in every single text, they are all decisive in defining the genre of the maximalist novel, insofar as they are systematically co-present. Taken singularly, they can be easily found both in modernist and postmodern novels, which are not maximalist. Nevertheless, it is precisely their co-presence, as well as their reciprocal articulation, which make them fundamental in demarcating the maximalist novel as a genre.
