Another very good study manual option for Exam P is the Coaching Actuaries [ADAPT + Manual] option. ADAPT is similar to GOAL, which is included with the ASM and ACTEX study manuals. It gives you hundreds of practice problems, but unlike GOAL, they're rated by difficulty level so you can gradually work on harder and harder problems as you improve.

This is a review manual for candidates wanting an ACSM credential. It combines content from 'ACSM's Health and Fitness Certification Review' and 'ACSM's Clinical Certification Review' into one resource.

The Actuarial Probability Exam (P) Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: algebraic reasoning; understanding information presented in tables; basic actuarial reasoning; supervision; and other related areas.

The book is divided into 11 sections, covering evidence-informed techniques in massage, trigger points, neural muscle energy, manipulations, dry needling, myofascial release, therapeutic exercise and psychological approaches. In the general introduction, several authors review the epidemiology of upper and lower extremity pain syndromes and the process of taking a comprehensive history in patients affected by pain. In chapter 5, the basic principles of the physical examination are covered, while chapter 6 places the field of manual therapy within the context of contemporary pain neurosciences and therapeutic neuroscience education. For the remaining sections, the book alternates the upper and lower quadrants. Sections 2 and 3 provide updates on mechanical neck pain, whiplash, thoracic outlet syndrome, myelopathy, radiculopathy, peri-partum pelvic pain, joint mobilizations and manipulations and therapeutic exercises, among others. Sections 4 to 9 review aspects of the shoulder, hip, elbow, knee, the wrist and hand, and finally the ankle and foot. The last two sections of the book are devoted to muscle referred pain and neurodynamics.
