This "relentlessly suspenseful" story of America's first known kidnapping in nineteenth century Philadelphia is "elegantly told, superbly accomplished" (The Philadelphia Enquirer). In 1874, a little boy named Charley Ross was snatched from his family's front yard in Philadelphia. A ransom note arrived three days later, demanding twenty thousand dollars for the boy's return. The city was about to host the America's Centennial celebration, and the mass panic surrounding the Charley Ross case plunged the nation into hysteria. The desperate

search led the police to inspect every building in Philadelphia, set up saloon surveillance in New York's notorious slums, and begin a national manhunt. With white-knuckle suspense and historical detail, Hagen vividly captures the dark side of an earlier America. Her brilliant portrayal of its criminals, detectives, politicians, spiritualists, and ordinary families will stay with the reader long after the final page. "Hagen skillfully narrates a saga that transcends one kidnapping, a saga tied up with the World's Fair that was about to open in Philadelphia." —Kirkus Reviews "As Erik Larson mined the 1893 Chicago World's Fair for Devil in the White City, Hagen chronicles a tragically more relevant 19th-century story." —Michael Capuzzo, author of The Murder Room

This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

This book explores the phenomenon of Independence Days. These rituals had complex meanings both in the territories concerned and in Britain as the imperial metropole, where they were extensively reported in the press. The text is concerned with the political management, associated rhetoric and iconography of these seminal celebrations. The focus is therefore very much on political culture in a broad sense, and changing perceptions and presentations over time. Highlights of the book include an overview by David Cannadine relating the topic to ornamentalism, invented tradition and transitions in British culture.

Although the book is mainly concerned with the British Empire, Martin Shipway – a leading historian and cultural analyst of French decolonization – contributes an acute summary of how the same 'moment' was handled differently in the other great European empires. There are detailed and lively studies by noted specialists of the immediate coming of Independence to India/Pakistan, Malaya, Ghana, Zimbabwe, and Guyana. The book includes a thematic focus on the important role of representatives of the British monarchy in legitimating transfers of sovereignty at their point of climax. This book was published as a special issue of The Round Table.
