There are many people who are enthusiastic about food—the cooking of it, the preparation of it, the serving of it, and let's not forget the eating of it. But Andrew Delaplaine is the ultimate Food Enthusiast. This is another of his books with spot-on reviews of the most exciting restaurants in town. Some will merit only a line or two, just to bring them to your attention. Others deserve a half page or more. "Exciting" does not necessarily mean expensive. The area's top spots get the recognition they so richly deserve (and that they so loudly demand), but there are plenty of "sensible alternatives" for those looking for good food handsomely prepared by cooks and chefs who really care what they "plate up" in the kitchen. For those with a touch of Guy Fieri, Delaplaine ferrets out the best food for those on a budget. That dingy looking dive bar around the corner may serve up one of the juiciest burgers in town, perfect to wash down with a locally brewed craft beer. Whatever your predilection or taste, cuisine of choice or your budget, you may rely on Andrew Delaplaine not to disappoint. Delaplaine dines anonymously at the Publisher's expense. No restaurant listed in this series has paid a penny or given so much as a free meal to be included. Bon Appetit!"

PUBLIC RELATIONS WRITING: FORM AND STYLE combines the practical approach of a trade book with the fundamental principles and theories of Public Relations to provide you with the essential techniques and methods needed to write with understanding and purpose. This text guides you through a logical progression of PR writing, starting with an explanation of how this kind of writing is unique and by exploring the legal and ethical obligations. The writing principles section, which covers both style and techniques, is followed by Public Relations writing assignments that you'll likely have to do in your early jobs: emails, memos, letters, reports and proposals, backgrounders and position papers. Writing for mass media and the more complex public relations writing functions, including media kits, media pitches, print and online newsletters, brochures, magazines, including those online, and annual reports are also covered in this comprehensive guide.

Provides practical guidance in the selection and use of respiratory protection to persons who work in the asbestos abatement industry (AAI). Includes: an intro. to the hazards associated with airborne asbestos and to the issues involving respiratory protection against asbestos; a model respiratory protection prog. for the AAI which both satisfies Fed. reg's. and incorp's. the most current info. on appropriate respirators for use against airborne asbestos fibers; a checklist for developing or evaluating a respiratory protection prog.; and info. on breathing air systems for supplied-air respirators.

From the bestselling author of *I Didn't Do My Homework Because...* comes an irresistible meditation on the quest for connection. When an elephant falls in love, he does many foolish things. He hides when the elephant-object of his affection is around. He writes dozens of letters that he will never send. And he tries to be healthy, but ends up finishing the cheesecake. This soulful book is at once relatable and revealing, a reminder that love is worth striving for, and that the very best things in life will come to those who wait. Plus, this is the fixed format version, which looks almost identical to the print edition.

The Low Protein Food List for PKU has been an indispensable resource for everyone involved in the treatment of phenylketonuria (PKU) since 1995. This third edition contains over 6,000 entries, the most extensive listing yet of foods that are potentially suitable for the diet, nearly double the number found in the previous edition. It includes many new foods found at health-oriented grocery stores, expanding choices for the diet. The book provides information on phenylalanine (phe), protein, and calorie content of foods based on serving portions, both in common measures and gram weights, in an easily searchable format. The handy "mg phe/gm food" column allows users to compare phenylalanine density of foods and make appropriate food choices for individual diet needs. People using an "exchange" system for counting phe will find exchanges are calculated for each food portion as well. The front section of the book also contains valuable information and tips for managing the PKU diet.

In *Future Luxe: What's Ahead for the Business of Luxury*, Erwan Rambourg identifies the major forces and emerging trends that are set to reshape luxury over the next decade. The expansion of Chinese consumption and the boost in women's spending power around the world will fuel continued growth in the industry--but even more importantly, fundamental changes are on the horizon. The younger

generation is entering the luxury market, bringing new values and demands that will redefine the very meaning of luxury. The sector should expand in the realms of travel, health, leisure, even cannabis. For brands to resonate with these younger consumers they will have to develop substance beyond a high-quality product or a desirable logo. Greenwashing won't cut it--brands will need to take seriously issues like diversity, sustainability, and ethical production. To ensure his portrait of the industry has the depth and nuance of real-world experience, Rambourg interviews several CEOs from the largest groups and brands, including Kering, Cartier, Puma, and Moncler, in addition to drawing on his own observations from over two decades in luxury. Future Luxe is engaging, wise, and deeply informed, a vital read for those new to the industry as well as veterans planning for continued success.
