This section describes the theory underlying the tables in the Audit Guide Audit Sampling (the guide) and the various formulas and algorithms that can be used to compute them. Because most of the tables relate to attributes sampling and MUS, that is the focus of this section—except for section 2.5, which deals with the relation

Technical Notes on the AICPA Audit Guide Audit Sampling ...

Sampling can provide a valid, defensible methodology but it is important to match the type of sample needed to the type of analysis required. The auditor should also take care to check the quality of the information from which the sample is to be drawn. If the quality is poor, sampling may not be justified.
