Beginning with the simple two-word sentence and working up to multi-clause possibilities, Templates shows students how to manipulate syntactic patterns for maximum rhetorical effect. Although it teaches grammar, it does not do so with the goal of correcting mistakes. Rather, it encourages writers to make full use of the complexity and flexibility of English sentence structure. Combining an emphasis on the writing process with both an awareness of audience and a raised consciousness about English grammar, Templates takes a unique approach to sentence-level writing and revision. Exercises throughout the book help students to move from simpler sentence structures to more complex multi-clause constructions. Key features: - Emphasizes the rhetorical possibilities of sentence structure - Grammatical analysis is demonstrated in terms of syntactic 'templates' - Shows how the writer can play to audience awareness of these templates - Promotes sentence-level editing as the fine-tuning stage of the writing process - Usage issues are presented as choices based on level of formality, rather than as prescriptive rules - Includes a glossary of grammatical terms

Creativity in Product Innovation describes a remarkable new technique for improving the creativity process in product design. Certain "regularities" in product development are identifiable, objectively verifiable and consistent for almost any kind of product. These regularities are described by the authors as Creativity Templates. This book describes the theory and implementation of these templates, showing how they can be used to enhance the creative process and thus enable people to be more productive and focused. Representing the culmination of years of research on the topic of creativity in marketing, the Creativity Templates approach has been recognized as a breakthrough in such journals as Science, Journal of Marketing Research, Management Science, and Technological Forecasting and Social Change.

In Analytical Templates of the Yerushalmi, Jacob Neusner systematically defines and classifies the four analytical initiatives of the Bavli in its encounter with the Mishnah. Neusner questions whether the Yerushalmi yields a comparable repertoire of fixed patterns of analysis. In covering four tractates, Neusner first presents a tractate of the Yerushalmi and inductively defines its program for analysis of the law seen in context. For each of the three additional tractates, Neusner creates a log of the forms and types of the exegetical templates brought to the Mishnah. Here the tractates are outlines, showing at a glance the program of each in the Yerushalmi. Each of the four divisions of the Mishnah covered by the Yerushalmi is represented by tractate. By compiling the data in this manner, Neusner makes possible an inductive account of the whole and concludes with remarks of the two Talmuds' analytical templates.
