In the turbulent 1990s in Russia, eighteen-year-old Svetlana is about to graduate from high school. She dreams of traveling and of becoming a Russian ambassador to the United States or England. But when she meets Yuri, a young ruffian working for the Russian Mafia, her life takes a drastic turn. Yuri wants to date Svetlana, but she rejects him, and Yuri swears vengeance. When Svetlana is offered the chance to be a nanny to a loving English family in London, she boards the plane without a second thought. Only too late does she discover that Yuri has carried out a vicious plot against her. Heathcliff, an imposing Englishman, certainly doesn't need a nanny-but he does need more girls for his prostitution ring, and beautiful, exotic Svetlana will make the perfect addition. Held hostage and forced to become a prostitute, Svetlana becomes all too familiar with the seedy London underworld. But Yuri didn't bargain on Svetlana's courageous inner spirit, and she'll do whatever it takes to escape-and seek her own revenge.

This book is essential for audio power amplifier designers and engineers for one simple reason...it enables you as a professional to develop reliable, high-performance circuits. The Author Douglas Self covers the major issues of distortion and linearity, power supplies, overload, DC-protection and reactive loading. He also tackles unusual forms of compensation and distortion produced by capacitors and fuses. This completely updated fifth edition includes four NEW chapters including one on The XD Principle, invented by the author, and used by Cambridge Audio. Crosstalk, power amplifier input systems, and microcontrollers in amplifiers are also now discussed in this fifth edition, making this book a must-have for audio power amplifier professionals and audiophiles.

A man with nothing left to lose... Rebel. Hell-raiser. Seducer in blue jeans. Ben Foster has been called many things — except father. His twelve-year-old daughter Alanna has never seen him, and he ' s starting to think that coming to Bethlehem to meet her could be the second biggest mistake of his life. And when he takes a job fixing up businesswoman Lynda Barone ' s new house, he may be on the brink of making a third: falling in love with a woman as wrong for him as he is for her ... except when he takes her in his arms. A woman with everything — but love... Lynda couldn' t remember the last time she had a date. Eighteen-hour workdays and frequent business trips had really taken a toll on her personal life. She ' d been so busy carving out a successful career that she almost didn' t notice how lonely she ' d become. That is, until Ben Foster strode into her life. Suddenly the sexy Southern handyman was invading her home, her senses, stirring dangerous fantasies of a love Lynda had convinced herself she could live without. Lucky for them, neither is the marrying kind... Or are they? Stranger things have happened in a place where the most unlikely lovers can suddenly get lucky. Even if luck has nothing to do with it...

This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.
