The aim of the guide is to provide guidance on how to maximise the opportunities for biodiversity in the planning and design of sustainable communities. The guide takes the user through the design process, presenting a toolkit of best practice that can be tailored according to the scale of the development opportunity. Cultural Commentary

A guide for sustainable communities

Biodiversity by Design is a TCPA Sustainable Communities guide. Published in hard copy in 2004, and on-line in 2005, It aims to provide guidance on how to maximise the opportunities for biodiversity in the planning and design of sustainable communities. It also seeks to highlight the wider social, economic and environmental benefits of biodiversity and green spaces in urban areas.

Biodiversity by Design | URBED

Global biodiversity has declined by more than a quarter in the last 35 years. Butterfly, bird and bee populations are dwindling and more than one in ten of the UK's wildlife species are threatened with extinction. Change on this scale isn't sustainable. Species must be wretched in diverse and protected habitats if we're to continue our long transaction of looking after the earth in exchange for food, energy, raw materials, clean air and clean water.
