May 2016. Many of the flight instruments such as the airspeed, altimeter and rate-of-climb on the first 747s were basically huff-n-puff type, i.e., they were pitot (pressure) and static (vacuum) instruments connected to the pitot probes mounted outside near the front of the airplane by aluminum tubing. The Air Data Computer was analog and also connected to the pitot-static tubing.

Boeing: 747's Electrifying Breakthrough

As a result, Boeing retained some traditional 747 systems, while introducing a new two-pilot glass cockpit with primary cathode ray tube displays and analogue gauges as backup. Another improvement on the 747-400 was and increased wingspan of 17 ft (5.2 m) and 6 ft (1.8m) winglets that reduced aerodynamic drag.
