Bosch K Jetronic Fuel Injection

In more elaborate terms, KJet is a Continuous Injection System (commonly called CIS), where unlike later L-Jetronic or "standard" Electronic Fuel Injection, the injectors do not pulse open and closed; once the system pressure is high enough they all inject a constant spray of fuel, in all cylinders at once, which is varied in volume by the system depending on various factors.

---

Bosch K-Jetronic - Part 1, The Basics - Tastes Like Petrol

The Bosch Continuous Injection System, Fig. 36, is a mechanically and continuously operating fuel injection system which does not have to be driven by the vehicle engine. The fuel is pumped by an electrically-driven roller cell fuel pump.

Gasoline Fuel-Injection System K-Jetronic

Mechanical fuel injection - Bosch K-Jetronic, Bosch K Jetronic The Fuel Pump This type of high pressure fuel pump is denoted as a roller cell pump, with the fuel entering the pump and being compressed by rotating cells that force it through the pump at high pressure. The pump is capable of producing a pressure of 8 bar (120 psi) with a

---

Mechanical Fuel Injection - B2 Resource

K-Jetronic Fuel Injection System K-Jetronic is a mechanically and hydraulically operated fuel injection pump, introduced by BOSCH GmbH in the year 1973. The K-Jetronic pump requires no form of drive and one of its features is that it can meter the fuel as a function of the intake air quantity. The letter "K" stands for continuous in German.

---

How Car Parts Work: K-Jetronic Fuel Injection System

It is probably the first fuel injection system that was used by a number of motor manufacturers and on the whole, is pretty reliable. it is quite a basic, mechanical system, as opposed to the more technical electronic engine management systems available now, and as such, is open to wear, corrosion and sticking of components and requires a certain amount of adjusting and cleaning to keep it working in the way Mr. Bosch intended.

---

## Bosch K Jetronic - Mechanical Fuel Injection Troubleshooter

Mechanical fuel injection, 'K' stands for German: "Kontinuierlich", meaning continuous. Commonly called 'Continuous Injection System (CIS) in the USA. K-Jetronic is different from pulsed injection systems in that the fuel flows continuously from all injectors, while the fuel pump pressurises the fuel up to approximately 5 bar (73.5 psi). The volume of air taken in by the engine is measured to determine the amount of fuel to inject.

---

## Jetronic - Wikipedia

Approximately up until 1994 mechanical fuel injection systems have been installed on certain Mercedes, Audi, Volkswagen, Ford etc. car models – starting with Bosch K-Jetronic, and after that – Bosch KE-Jetronic. These fuel injection systems were considered to be really reliable and trustworthy. Basically, such conclusion can be made based on a large number of cars that had such injection systems installed by the manufacturers during that time. However, the time has passed and all the ...
