Bruce Michael Alberts is an American biochemist and the Chancellor's Leadership Chair in Biochemistry and Biophysics for Science and Education at the University of California, San Francisco. He has done important work studying the protein complexes which enable chromosome replication when living cells divide. He is known as an original author of the "canonical, influential, and best-selling scientific textbook" Molecular Biology of the Cell, and as Editor-in-Chief of Science magazine ...

The original idea of a book such as MBoC belonged exclusively to James Watson. In the early 1970s, he wisely spotted a latent hurdle for his long-time vision of transforming the whole biology field into a molecular science. He recognized that the knowledge of cell biology at the time was almost entirely based on light and electron microscopy investigations, and for students this hardly integrated any new molecular biology.
