I'm giving this sequel 3.5 stars. Cameron Jace tells us readers at the end of the book that he needed to develop the characters more in this book and that is why we are left we less travels and riddles. I found book one to be a very fun read. This one was still fun, but less so.](#)

After accidentally killing everyone in her class, Alice Wonder is now a patient in the Radcliffe Lunatic Asylum. No one doubts her insanity. Only a hookah-smoking professor believes otherwise; that he can prove her sanity by decoding Lewis Carroll's paintings, photographs, and find Wonderland's real whereabouts. Professor Caterpillar persuades the asylum that Alice can save lives and catch the wonderland monsters now reincarnated in modern day criminals. In order to do so, Alice leads a double life: an Oxford university student by day, a mad girl in an asylum by night. The line between sanity and insanity thins when she meets Jack Diamond, an arrogant college student who believes that nonsense is an actual science.

After her encounter with the Cheshire Cat, Alice Wonder can hardly tell reality from imagination. But when kids have their head chopped off and stuffed in watermelons all over the city, it's clear that another Wonderland Monster has arrived, possibly scarier than the Cheshire. Alice, along with Professor Pillar, have to solve the killer's puzzles before a horrible event threatens the death of millions. Then Jack Diamonds appears again. This time, Alice must know who he really is.

From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined. Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be. They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world. Praise for The Class " Erich Segal ' s best. " —Pittsburgh Press " First class entertainment. " —Cosmopolitan " An absorbing page-turner. " —Publishers Weekly " A panoramic saga. " —Philadelphia Inquirer

What is the relationship between cinema and spectator? This is the key question for film theory, and one that Thomas Elsaesser and Malte Hagener put at the center of their insightful and engaging book, now revised from its popular first edition. Every kind of cinema (and every film theory) first imagines an ideal spectator, and then maps certain dynamic interactions between the screen and the spectator ' s mind, body and senses. Using seven distinctive configurations of spectator and screen that move progressively from ' exterior ' to ' interior ' relationships, the authors retrace the most important stages of film theory from its beginnings to the present—from neo-realist and modernist theories to psychoanalytic, ' apparatus, ' phenomenological and cognitivist theories, and including recent cross-overs with philosophy and neurology. This new and updated edition of Film Theory: An Introduction through the Senses has been extensively revised and rewritten throughout, incorporating discussion of contemporary films like Her and Gravity, and including a greatly expanded final chapter, which brings film theory fully into the digital age.
