Based on an examination of more than twenty campus lawsuits involving rape, this study analyzes why so few women report an assault, why many cases are mishandled, and how to deal with a sexual assault when it occurs.

This study compares the methods used to promote new Campus Solutions systems on college/university campuses during the past ten years to the time reported for full adoption by students, staff, and instructors. Questionnaires sent to staff members involved in these implementations were analyzed to determine whether their publicity program focused on students, staff, faculty, or some combination of those constituencies, and whether that focus used opinion leaders. The patterns provided by their answers were then compared to the reported time after full implementation that full adoption by each constituency was achieved. Though some staff members reported a use of opinion leaders and a focus on one or more constituencies, no correlation could be found between the use of these components of Diffusion of Innovations theory and the reported time to full adoption by one or more constituencies.

Biography of Alan Sweeney, currently Senior Systems Administrator at Dynamic Campus, previously Senior IT Manager of Server Services at Lone Star College System and Server Manager at SunGard Higher Education.

Campus Network Architectures and Technologies begins by describing the service challenges facing campus networks, and then details the intent-driven campus network architectures and technologies of Huawei Cloud Campus Solution. After reading this book, you will have a comprehensive understanding of next-generation campus network solutions, technical implementations, planning, design, and other know-how. Leveraging Huawei's years of technical expertise and practices in the campus network field, this book systematically describes the use of technical solutions such as virtualization, big data, AI, and SDN in campus networks. You will be able to reconstruct campus networks quickly and efficiently utilizing this informative description. Additionally, this book provides detailed suggestions for campus network design and deployment based on Huawei's extensive project implementation experience, assisting with the construction of automated and intelligent campus networks required to cope with challenges. This is a practical, informative, and easy-to-understand guide for learning about and designing campus networks. It is intended for network planning engineers, network technical support engineers, network administrators, and enthusiasts of campus network technologies. Authors Ningguo Shen is Chief Architect for Huawei's campus network solutions. He has approximately 20 years' experience in campus network product and solution design, as well as a wealth of expertise in network planning and design. Mr. Shen previously served as a system engineer for the campus switch, data center switch, and WLAN product lines, and led the design of Huawei's intent-driven campus network solution. Bin Yu is an Architect for Huawei's campus network solutions. He has 12 years' experience in campus network product and solution design, as well as extensive expertise in network planning and design and network engineering project implementation. Mr. Yu once led the design of multiple features across various campus network solutions. Mingxiang Huang is a Documentation Engineer for Huawei's campus network solutions. He has three years of technical service experience, and four years of expertise in developing campus network product documentation. Mr. Huang was previously in charge of writing manuals for Huawei router and switch products. He has authored many popular technical series, including Be an OSPF Expert, Insight into Routing Policies, and Story behind Default Routes. Hailin Xu is a Documentation Engineer for Huawei's campus network solutions. He has two years of marketing experience in smart campus solutions, and six years of expertise in developing network products and solution documentation. Extremely familiar with Huawei's campus network products and solutions, Mr. Xu was previously in charge of writing manuals for Huawei routers, switches, and campus network solutions. In addition, he has participated in smart campus marketing projects within such sectors as education, government, and real estate.

Colleges and universities across North America are facing difficult questions about automobile use and transportation. Lack of land for new parking lots and the desire to preserve air quality are but a few of the factors leading institutions toward a new vision based upon expanded transit access, better bicycle and pedestrian facilities, and incentives that encourage less driving. Transportation and Sustainable Campus Communities presents a comprehensive examination of techniques available to manage transportation in campus communities. Authors Will Toor and Spenser W. Havlick give readers the understanding they need to develop alternatives to single-occupancy vehicles, and sets forth a series of case studies that show how transportation demand management programs have worked in a variety of campus communities, ranging from small towns to large cities. The case studies in Transportation and Sustainable Campus Communities highlight what works and what doesn't, as well as describing the programmatic and financial aspects involved. No other book has surveyed the topic and produced viable options for reducing the parking, pollution, land use, and traffic problems that are created by an over-reliance on automobiles by students, faculty, and staff. Transportation and Sustainable Campus Communities is a unique source of information and ideas for anyone concerned with transportation planning and related issues.

The revised and updated edition includes the latest developments in the field of ERP, information technology and new technologies that are changing the ERP landscape. Divided into eight sections, the book covers ERP Basics, ERP and Technology, ERP Implementation, Operation and Maintenance of the ERP system, Business Modules of ERP, ERP Market, Present and Future of ERP, ERP Resources, Case studies, Career guidance, Manufacturing perspective, etc.
