Romeo & Juliette Laser Hair Removal uses the world's most advanced lasers. Our lasers offer optimal wavelengths for hair removal, facials, facial rejuvenation, and treatment of pigmented lesions, acne, scars, sun-damaged skin, spider veins and facial and leg telangiectasias.

Types of Lasers for Laser Hair Removal NYC | Best Laser

Depending on usage, only one PM per year may be necessary. As lasers in use today deliver very high treatment energies, there is 'wear-out' associated with laser components, thus requiring replacement. Most all medical laser systems will require service at some point in their life. Unfortunately, this is just a fact of life to be expected.

FAQ - Service Questions | Laser Scientific

Green, blue, and purple tattoo pigments are often the colors most resistant to laser removal. Recently, the first ever production picosecond-domain laser with a 785 nm wavelength was developed by Syneron Candela to improve the rate of clearance of green, blue, and purple tattoo inks.
