Case interviews last about 30 minutes during which you will analyse and solve a business problem. These cases are usually inspired from past consulting projects your interviewer will have worked on. The objective of a case interview is to recreate the conditions you will face in a real consulting project so that your interviewer can get an idea of how you will perform on the job.

The core skill that you need to develop to master case interview math is the skill of discerning when a calculation is necessary and when it's not. Remember, the challenging part about doing case interview math isn't always the computation itself. It is about being able to judge whether a computation is even necessary in the first place.
