CENTURY III

Operator's Manual Extracts - The Century III is a light weight (approximately 18 pounds), all electronic, three axis autopilot system. It is called a three axis system because it controls heading, roll and pitch. Note that the standard Century III, although referred to as a three axis system, contains only two controls servos.

(On the other hand, when the Century III worked, it was amazing.) After flying with Century III and Century 41 autopilots for over 40 years, I had grown accustomed to this quiet, invisible and completely reliable equipment flying the plane for long hours at a time. The need for a reliable autopilot

Restoration on a Budget: A New/Used Autopilot

The Piper Altimatic III, IIB, and IIC became the Century III. These are two-axis, full-featured autopilots with most of the bells and whistles, including altitude hold and glideslope coupling. These are common in Piper performance singles and light twins. The Piper Altimatic X (10) became the Century IV and filled the role of a full-featured autopilot with Flight Director for the heavier ...
