traditional C programming and embedded C. Chapter 4 deals with the

programming of on-chip resources of MCS-51 family microcontrollers in C. The theoretical details of these on-chip resources such as ports, timers, etc., are completely eliminated.

As the book aims at hands-on approach, the

Bookmark File

programs for the on-chip resources have been developed

~~EXPLORING C FOR MICROCONTROLLERS~~

C++ templates are a useful facility in these situations. When we use C++ function templates, only one function "signature" needs to be created. The C++ compiler will

Bookmark File PDF Chapter 4

automatically generate
the required functions
for handling the
individual data types.

This makes
programming much
easier - Here is an
example:
