variety of fields, including the neurosciences, education, forensics, and behavioral health. While new research accumulates, there remains a lack of conceptual and practical clarity about what ASD is, how specific diagnoses might be delineated, and what we can do to understand and manage the complexity of individuals on the Spectrum. Are you an architect? Scrum Master? team leader? project manager? If you are any of these, you will find that leadership, done right, is a very tough job. This book deals with the hard parts. Not with tools, but with people. Here is the manifesto that drives this book: For us as team leaders, the goal and the way we measure our work is the overall growth in skills of self-organization and self-maintenance in each member of our team and the team as a whole. To that end: We accept that the team's needs from us change continuously based on their skills for handling the current reality of work, so we embrace a continuously changing leadership style over a one-style-fits-all leadership approach. We believe in challenging ourselves and our teams to always get better, so: \* We create slack time for the team to learn and be challenged. \* We embrace
