City, Street and Citizen: The Measure of the Ordinary. Suzanne Hall. Routledge. April 2012. Find this book: Suzanne Hall makes explicit that her excellent new book, City, Street and Citizen: the Measure of the Ordinary, reflects her own biographical story in its subject, methods and preoccupations. Having trained and worked as an architect in South Africa in the late 1990s and early 2000s, Hall moved to London to embark on a career as an urban ethnographer at the LSE.

Book Review: City, Street and Citizen: the Measure of the ...

City, Street and Citizen, published by Routledge, is a fine-grained account of accelerated urban change and focuses on the lived realities of participation and belonging in an increasingly diverse and disparate urban milieu. Based on the author's PhD thesis, the book engages with near and far views of a south London street and draws on history, everyday life, global forces and small spaces to ...

How can we learn from a multicultural society if we don't know how to recognise it? The contemporary city is more than ever a space for the intense convergence of diverse individuals who shift in and out of its urban terrains. The city street is perhaps the most prosaic of the city's public parts, allowing us a view of the very ordinary practices of life and livelihoods. By attending to the expressions of conviviality and contestation, 'City, Street and Citizen' offers an alternative notion of 'multiculturalism' away from the ideological frame of nation, and away from the moral imperative of community. This book offers to the reader an account of the lived realities of allegiance, participation and belonging from the base of a multi-ethnic street in south London. 'City, Street and Citizen' focuses on the question of whether local life is significant for how individuals develop skills to live with urban change and cultural and ethnic diversity. To animate this question, Hall has turned to a city street and its dimensions of regularity and propinquity to explore interactions in the small shop spaces along the Walworth Road. The city street constitutes exchange, and as such it provides us with a useful space to consider the broader social and political significance of contact in the day-to-day life of multicultural cities. Grounded in an ethnographic approach, this book will be of interest to academics and students in the fields of sociology, global urbanisation, migration and ethnicity as well as being relevant to politicians, policy makers, urban designers and architects involved in cultural diversity, public space and street based economies.

Once a thriving metropolis on the banks of the Mississippi, St. Louis, Missouri, is now a ghostly landscape of vacant houses, boarded-up storefronts, and abandoned factories. The Gateway City is, by any measure, one of the most depopulated, deindustrialized, and deeply segregated examples of American urban decay. "Not a typical city," as one observer noted in the late 1970s, "but, like a Eugene O'Neill play, it shows a general condition in a stark and dramatic form." Mapping Decline examines the causes and consequences of St. Louis's urban crisis. It traces the complicity of private real estate restrictions, local planning and zoning, and federal housing policies in the "white flight" of people and wealth from the central city. And it traces the inadequacy—and often sheer folly—of a generation of urban renewal, in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs. The urban crisis, as this study of St. Louis makes clear, is not just a consequence of economic and demographic change; it is also the most profound political failure of our recent history. Mapping Decline is the first history of a modern American city to combine extensive local archival research with the latest geographic information system (GIS) digital mapping techniques. More than 75 full-color maps—rendered from census data, archival sources, case law, and local planning and property records—illustrate, in often stark and dramatic ways, the still-unfolding political history of our neglected cities.

Thirty years after its publication, The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning...[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

What does it mean to design democratic cities and democratic citizens in a time of mass urbanization and volatile political transformation? Citizen Designs: City-Making and Democracy in Northeastern Thailand addresses this question by exploring the ways that democratic urban planning projects intersect with emerging political aspirations among squatters living in the northeastern Thai city of Khon Kaen. Based on ethnographic and historical research conducted since 2007, Citizen Designs describes how residents of Khon Kaen's railway squatter communities used Thailand's experiment in participatory urban planning as a means of reimagining their citizenship, remaking their communities, and acting upon their aspirations for political equality and the good life. It also shows how the Thai state used participatory planning and design to manage both situated political claims and emerging politics. Through ethnographic analysis of contentious collaborations between residents, urban activists, state planners, participatory architects, and city officials, Eli Elinoff's analysis reveals how the Khon Kaen's railway settlements became sites of contestation over political inclusion and the meaning and value of democracy as a political form in the first decades of the twenty-first century. Elinoff examines how as residents embraced politics to enact their equality, they inspired new debates about what good citizenship might mean and how democracy might look and feel. The disagreements over citizenship, like those Elinoff describes in Khon Kaen, reflect the kinds of aspirations for political equality that have been fundamental to Thailand's political transformation over the last two decades, which has seen new political actors asserting themselves at the ballot box and in the streets alongside the retrenchment of military authoritarianism. Citizen Designs offers new conceptual and empirical insights into the lived effects of Thailand's political volatility and into the current moment of democratic ambivalence, mass urbanization, and authoritarian resurgence.

"Required reading." —Josh Tickell, author of The Revolution Generation Since its beginnings in 2009, Generation Citizen has grown to become one of the preeminent civics education organizations in America. Championing the activism of young people now and throughout history—from the civil rights movement to #BlackLivesMatter and the Parkland students—Generation Citizen is a bold reminder of the positive power of politics, and an inspiring, actionable guide for anyone ready to fight for democracy. "Timely and accessible. The rising generation is ready to exercise power—and save our republic." —Eric Liu, CEO of Citizen University and author of You're More Powerful Than You Think

"This is an extraordinary treatment of a difficult problem. . . . Much more than a conventional comparative study, City of Walls is a genuinely transcultural, transnational work—the first of its kind that I have read."—George E. Marcus, author of Ethnography Through Thick & Thin "Caldeira's work is wonderfully ambitious-theoretically bold, ethnographically rich, historically specific. Anyone who cares about the condition and future of cities, of democracy, of human rights should read this book."—Thomas Bender, Director of the Project on Cities and Urban Knowledge "City of Walls is a brilliant analysis of the dynamics of urban fear. The sophistication of Caldeira's arguments should stimulate new discussion of cities and urban life. Its significance goes far beyond the borders of Brazil."—Margaret Crawford, Professor of Urban Planning and Design Theory, Graduate School of Design, Harvard University "Caldeira's insight illuminates the geography of the city as well as the boundaries—or the lack of boundaries—of violence."—Paul Chevigny, author of Edge of the Knife: Police Violence in the Americas "An extraordinary account of violence in the city. . . . Caldeira brings to this task a rare depth of knowledge and understanding."—Saskia Sassen, author of Globalization and Its Discontents "An outstanding contribution to understanding authoritarian continuity under political reform. Caldeira has written a brilliant and bleak analysis on the many challenges and obstacles which government and civil society face in new democracies."—Paulo Sérgio Pinheiro, Director of the Center for the Study of Violence, University of São Paulo and Member of the United Nations Sub-Commission for the Promotion and Protection of Human Rights

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Connects global migration with urban marginalization, exploring how "race" maps onto place across the globe, state, and street In this richly observed account of migrant shopkeepers in five cities in the United Kingdom, Suzanne Hall examines the brutal contradictions of sovereignty and capitalism in the formation of street livelihoods in the urban margins. Hall locates The Migrant's Paradox on streets in the far-flung parts of de-industrialized peripheries, where jobs are hard to come by and the impacts of historic state underinvestment are deeply felt. Drawing on hundreds of in-person interviews on streets in Birmingham, Bristol, Leicester, London, and Manchester, Hall brings together histories of colonization with current forms of coloniality. Her six-year project spans the combined impacts of the 2008 financial crisis, austerity governance, punitive immigration laws and the Brexit Referendum, and processes of state-sanctioned regeneration. She incorporates the spaces of shops, conference halls, and planning offices to capture how official border talk overlaps with everyday formations of work and belonging on the street. Original and ambitious, Hall's work complicates understandings of migrants, demonstrating how migrant journeys and claims to space illuminate the relations between global displacement and urban emplacement. In articulating "a citizenship of the edge" as an adaptive and audacious mode of belonging, she shows how sovereignty and inequality are maintained and routed.

Urban sustainability citizenship situates citizens as social change agents with an ethical and self-interested stake in living sustainably with the rest of Earth. Such citizens not only engage in sustainable household practices but respect the importance of awareness raising, discussion and debates on sustainability policies for the common good and maintenance of Earth's ecosystems. Sustainability Citizenship in Cities seeks to explain how sustainability citizenship can manifest in urban built environments as both responsibilities and rights. Contributors elaborate on the concept of urban sustainability citizenship as a participatory work-in-progress with the aim of setting its practice firmly on the agenda. This collection will prompt practitioners and researchers to rethink

contemporary mobilisations of urban citizens challenged by various environmental crises, such as climate change, in various socio-economic settings. This book is a valuable resource for students, academics and professionals working in various disciplines and across a range of interdisciplinary fields, such as: urban environment and planning, citizenship as practice, environmental sociology, contemporary politics and governance, environmental philosophy, media and communications, and human geography.
