Combination Fire & Smoke Dampers -  
Ruskin

Combination fire & smoke dampers prevent the flow of both flames and smoke in structures. Therefore, it is imperative to have combination fire & smoke damper installation professionals perform this task. We have teams around the world that are more than qualified to install your combination fire & smoke dampers.

Nailor's True Round Combination  
Fire/Smoke Damper, Model 1290FS-  
SS, is ideal for mildly corrosive  
environment round duct applications  
where building codes require both a  
fire damper for the protection of  
ductwork penetrations in walls or floor  
that have a fire resistance rating of up  
to 2 hours and a leakage rated damper

## COMBINATION FIRE/SMOKE DAMPERS - Nailor

The FSDR60 is a "true round" Class 1 leakage rated combination fire and smoke damper designed for use in metal, wood or concrete fire and smoke rated partitions and concrete floors. The FSDR60 is the ideal choice when round duct is used on a project. The dampers are rated for maximum velocity of 3,000 fpm and 4" static pressure.

---

Combination Fire Smoke Dampers are

# Acces PDF Combination Fire Smoke Marine Damper

used to prevent the passage of both flame and smoke. These motorized dampers are available in 3 classes; ultra-low leakage (class 1), low leakage (class 2), and leakage (class 3). Voltage of electric motors offered in 24 volt, 120 volt and 220 volt, with or without an end switch in Belimo and Siemens brands. Pneumatic motors that operate by a combination of force created by air and spring force are also an option.

Combination Fire & Smoke Dampers -  
CVS

Combination - Fire/Smoke Dampers .  
These are self explanatory and fulfil  
the dual role of a fire and a smoke  
damper. They are commonly used in  
HVAC penetrations where a wall or  
ceiling or floor requires both smoke  
and fire dampers. When smoke is  
detected they close (via smoke  
detector) or by heat detection (via duct  
temperature).

---

What is the difference between Smoke  
and Fire dampers?

Smoke dampers are passive fire  
protection products used in air  
conditioning and ventilation ductwork  
or installed in physical smoke barriers.  
This may be done to prevent the

# Acces PDF Combination Fire Smoke Marine Damper

Also Approved Pla  
spread of smoke from the space of fire origin to other spaces in the same building. A combination of fans and dampers can exhaust smoke from an area while pressurizing the smoke-free areas around the affected area. It may also be used to maintain the required concentration of a fire suppression clean agent in a space, as ins

---

Smoke dampers - Wikipedia

Technology that Saves Lives. Belimo fire and smoke damper actuators are designed for operation in smoke and combination fire and smoke dampers in ventilation and air-conditioning systems with a torque range from 18 in-lbs to 180 in-lbs @ 350° F. For maximum safety in all situations, the fire and smoke actuators meets all codes for commercial buildings in the

U.S., passes UL 555 & UL 555S at 350°F and tested for 30,000 open-closed cycles with approved dampers.

---

## Fire and Smoke Damper Actuators | Belimo

Smoke dampers are installed in smoke barriers and smoke partitions.

Combination fire and smoke dampers that are required by Chapter 7 can be installed in any of the applications that require both fire rated construction and smoke containment. They are meant to resist the passage of flames and smoke particulates.

---

## Code Required Testing of Fire, Smoke and Combination Dampers

Answer: Use a modulating  
combination fire/smoke damper from

# Acces PDF Combination Fire Smoke Marine Damper

Ruskin. 1. First, they are a fire damper that closes automatically upon detection of heat, resists the passage of flame and maintains the integrity of the fire rated separation. 2.

---

## Modulating Fire/Smoke Dampers ☐ Three Dampers in ONE!

A combination fire/smoke damper is widely considered to offer the best of both worlds, when it comes to protection. They are utilised when a duct is required to have both a fire damper and a smoke damper, and either high temperature or smoke detection is the trigger for closure.
