compound shapes ...

Area of the rectangle =
 $15 \times 20 = 300 \text{ mm}^2$;

Area of the trapezium =
 $\frac{1}{2} \times (10 + 13) \times 6 = \frac{1}{2} \times$
 $23 \times 6 = \frac{1}{2} \times 138 = 69$

mm^2 ; Area of the
shaded shape = $300 - 69$
 $= 231 \text{ mm}^2$

Figures Area
And Perimeter

So area is 44 square inches. Perimeter is 26 inches. And that makes sense because this is a two-dimensional measurement. It's measuring something in two-dimensional space, so you get a two-dimensional unit. This is a one-dimensional measurement.

Perimeter and Area of
Composite Figures
Usually when dealing
with a composite shape
you are interested in
finding its area or
perimeter. There are two
general methods for
finding the area of a
composite shape.

Acces PDF

Composite

Method 1: Find the individual areas of each piece of the composite shape. The area of the composite shape will be the sum of the individual areas.

Now that we know the lengths of all of the sides, we can find the perimeter of the composite shape. Again, it may be helpful to look for number bonds to make the perimeter calculation easier. For example, $12 + 8 = 20$. The total is 42, so the

Now we can actually figure out the area. The area of this rectangle is just going to be its height times its length, or 9 times 3.5. 9 times 3.5. And one way you could do it-- we could even try to do this in our head-- this is going to be 9 times 3 plus 9 times 0.5. 9 times 3 is 27. 9 times 0.5, that's just half
