As the population ages and more people with disabilities seek to drive, occupational therapists will increasingly need to address this instrumental activity of daily living with their clients. The OT-DORA Battery is a unique, user-friendly, and convenient collection of assessments that allows efficient evaluation of an individual's cognitive, perceptual, behavioral, physical, and sensory skills and abilities that are related to driving, prior to an on-road assessment. The OT-DORA also offers the ability to screen clients who are unsafe to take an on-road assessment. Done easily in a clinical setting, without driving simulators or taking the client on-road, the OT-DORA Battery allows practitioners to, with minimal risk and expense, find clients' strengths and weaknesses and pinpoint areas on which to focus during rehabilitation. The manual describes how the OT-DORA was developed, summarizes research to support its use, and details instructions on how to administer the Battery with clients. A flash drive contains downloadable and writable versions of the administration and client response booklets for use in the United States, Canada, the United Kingdom, and Australia. Sections of the assessment include- Initial Interview Medical History Medication Screen Sensory Assessments-for communication and hearing, vision, and proprioception Physical Assessments-for motor skills, balance, and endurance Cognitive Assessments Summary of Issues Further Assessments. The OT-DORA Battery can be administered by generalist and specialist occupational therapists as well as by other health professionals with specialized training, experience, and certification in driver assessment, as well as by driver rehabilitation professionals with specialized training in determining how health-related changes can affect performance skills and elicit patterns that may compromise driving ability.

Assessments in Occupational Therapy Mental Health: An Integrative Approach, Third Edition is a unique compilation of mental health assessments that are taught in occupational therapy academic programs, as well as used in clinical practice. This highly anticipated Third Edition provides the occupational therapy student and educator with knowledge about the evaluation process, assessments that are current and accurate, and how to generate research for developing assessment tools. Proper documentation is critical to your success. Clear the confusion, streamline processes, and ensure accuracy, with "Essential Forms for Therapists" For a rehab facility, proper documentation is the most critical aspect of financial survival. But unfortunately, it is an area that causes confusion for clinical and non-clinical staff alike. If therapists do not document properly, they run the risk of improper reimbursement and denials. And even if done properly, documentation can be time-consuming and difficult.Simplify the process and ensure accuracy This book and CD-ROM set features over 100 modifiable forms, including: Therapy registration forms Plan of treatment for outpatient rehabilitation forms Plan of progress forms Therapy daily notes forms and flow sheets All are designed and tested by experts in the field to ensure that critical information is recorded accurately. Save time and streamline your processesThe book is divided into four sections for your convenience: Therapy documentation Managed care Personnel management and human resources Essential CMS And the CD-ROM includes additional sections for job descriptions and performance reviews. These forms can easily be customized to fit individual or clinic needs and are geared toward all therapy staff.Take a look at some of the time-saving forms you'll receive: Inpatient rehab patient assessment instrument Medical necessity documentation form Occupational therapy flow sheet Physical therapy and occupational therapy evaluation Physical therapy daily notes Physical therapy flow sheet Plan of progress for outpatient rehabilitation Plan of treatment for outpatient rehabilitation Rehabilitation therapy registration form Speech language pathology flow sheet Speech therapy evaluation Therapy checklist Therapy discharge therapy progress report Updated plan of progress for outpatient rehab Advanced beneficiary notice-General Advanced beneficiary notice-Laboratory CORE facility request for certification to participate in Medicare program CORP survey report Fire safety report Fire-smoke zone evaluation worksheet Medicare reconsideration request form Medicare redetermination request form Notice of denial of medical coverage Notice of denial of payment Who will benefit . . . Thoroughly updated, the 5th edition of CLINICAL RESEARCH IN OCCUPATIONAL THERAPY enables the graduate student and clinical researcher to design and carry out a research study from the formulation of a research hypothesis to collecting data utilizing user friendly step-by-step procedures. An introductory chapter on the history of medical research acquaints the student with the relationship between research and clinical practice. Step-by-step procedures and examples are used throughout to guide the student through the process of selecting a topic, reviewing literature, designing research protocols, selecting outcome measures, implementing research, and writing the results. Descriptive and inferential statistics are explained in a step-by-step procedure, and examples of qualitative and quantitative research are included so as to provide the student with tools to conduct their own research and evaluate current research data. A section on writing questionnaires and surveys helps students construct reliable and valid instruments, and information on scientific writing and thesis preparation is presented. Additionally, ethical considerations for informed consent are addressed, with examples of consent forms included. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Since the second edition of this text was published in 1997, significant developments have taken place within occupational therapy in the mental health context. In this new edition, Linda Finlay addresses and reflects on these changes, including those brought about by the National Service Framework for Mental Health. Updated with a more evidence-based approach, this discussion of the theory and practice of occupational therapy emphasises the need for clear aims of treatment on the basis of a sound theoretical understanding. Case studies, practical illustrations and examples of research demonstrate the practical application of occupational therapy. At the end of each chapter, a Conclusion and Reflections section aims to provoke discussion, aided by the author's personal reflections.
