A "tremendous," "intrepid" history of the devastating war in the heart of Africa's Congo, with first-hand accounts of the continent's worst conflict in modern times. At the heart of Africa is the Congo, a country the size of Western Europe, bordering nine other nations, that since 1996 has been wracked by a brutal war in which millions have died.

In *Dancing in the Glory of Monsters*, renowned political activist and researcher Jason K. Stearns has written a compelling and deeply-reported narrative of how Congo became a failed state that collapsed into a war of retaliatory massacres. Stearns brilliantly describes the key perpetrators, many of whom he met personally, and highlights the nature of the political system that brought these people to power, as well as the moral decisions with which the war confronted them. Now updated with a new introduction, *Dancing in the Glory of Monsters* tells the full

he still managed to shrewdly cultivate his reputation as a great humanitarian. A tale far richer than any novelist could invent, King Leopold's Ghost is the horrifying account of a megalomaniac of monstrous proportions. It is also the deeply moving portrait of those who defied Leopold: African rebel leaders who fought against hopeless odds and a brave handful of missionaries, travelers, and young idealists who went to Africa for work or adventure but unexpectedly found themselves witnesses to a holocaust and participants in the twentieth century's first great human rights

The Rwandan genocide sparked a horrific bloodbath that swept across sub-Saharan Africa, ultimately leading to the deaths of some four million people. In this extraordinary history of the recent wars in Central Africa, Gerard Prunier offers a gripping account of how one grisly episode laid the groundwork for a sweeping and disastrous upheaval. Prunier vividly describes the grisly aftermath of the Rwandan genocide, when some two

million refugees--a third of Rwanda's population--fled to exile in Zaire in 1996. The new Rwandan regime then crossed into Zaire and attacked the refugees, slaughtering upwards of 400,000 people. The Rwandan forces then turned on Zaire's despotic President Mobutu and, with the help of a number of allied African countries, overthrew him. But as Prunier shows, the collapse of the Mobutu regime and the ascension of the corrupt and erratic Laurent-D?sir? Kabila created a power vacuum that drew Rwanda, Uganda, Angola, Zimbabwe, Sudan, and other African nations into an

extended and chaotic war. The heart of the book documents how the whole core of the African continent became engulfed in an intractible and bloody conflict after 1998, a devastating war that only wound down following the assassination of Kabila in 2001. Prunier not only captures all this in his riveting narrative, but he also indicts the international community for its utter lack of interest in what was then the largest conflict in the world. for change. "Without drastic adjustment, this system cannot last much longer," writes Van Reybrouck, regarded today as one of Europe's most astute thinkers. "If you look at the decline in voter turnout and party membership, and at the way politicians are held in contempt, if you look at how difficult it is to form governments, how little they can do and how harshly they are punished for it, if you look at how quickly populism, technocracy and anti-parliamentarianism are rising, if you look at how more and more citizens are longing for participation and how quickly that desire

can tip over into frustration, then you realize we are up to our necks." Not so very long ago, the great battles of democracy were fought for the right to vote. Now, Van Reybrouck writes, "it's all about the right to speak, but in essence it's the same battle, the battle for political emancipation and for democratic participation. We must decolonize democracy. We must democratize democracy." As history, Van Reybrouck makes the compelling argument that modern democracy was designed as much to preserve the rights of the powerful and keep the

masses in line, as to give the populace a voice. As change-agent, Against Elections makes the argument that there are forms of government, what he terms sortitive or deliberative democracy, that are beginning to be practiced around the world, and can be the remedy we seek. In Iceland, for example, deliberative democracy was used to write the new constitution. A group of people were chosen by lot, educated in the subject at hand, and then were able to decide what was best, arguably, far better than politicians would have. A fascinating, and workable

"King Leopold of Belgium's exploits up the Congo River in the 1880s were central to the European partitioning of the African continent. The Congo Free State, Leopold's private colony, was a unique political construct that opened the door to the savage exploitation of the Congo's natural and human resources by international corporations. The resulting 'red rubber' scandal—which laid bare a fundamental contradiction between the European propagation of free labor and 'civilization' and colonial governments' acceptance of violence and coercion for productivity's
