On the following video I ' m showing how you can create DataSnap REST Server in Delphi, expose server methods and call them from an Android application. The video shows all the steps to create the server and the Android application. This is a short recap of the video. In order to have other platforms connecting and interacting with your DataSnap Server you need to enable the REST Interface, and for mobile

~~Connecting Android With Delphi Datasnap Server~~

Once the data module generates a Datasnap connection, it creates a DBXConnection that establishes a tunnel between the DataSnap server and the client. Closing the TSQLConnection also closes the DBXConnection and breaks the tunnel. This tunnel will not be re-established if you open a connection again.

~~Connecting Android apps to C++Builder DataSnap Server~~
DataSnap is a distributed computing technology available in RAD Studio. The RAD Studio XE release greatly increases the cross-platform and cross-language reach of DataSnap, particularly for REST implementations.. The DataSnap dispatcher handles all the client-based communication and marshalling automatically, so developers can usually forget about the communication and marshalling mechanics ...
