Constructing Effective Criticism How to Give, Receive, and Seek Productive and Constructive Criticism in Our Lives. Posted June 27th, 2020 by geveq.

Constructing Effective Criticism How to Give, Receive, and ...

Effective constructive criticism requires a delicate balance. When criticism is too harsh, recipients shut down emotionally, get defensive, and fail to find positive motivation in the words being said. And when criticism is too soft, recipients fail to hear the message that they really do need to change and improve.

observed in business. I soon came to conclude 4 rules that helped me to understand what I saw and guided me to develop my own leadership methods.

This volume is the logical follow-up to the military treatment handbook: Living and Surviving in Harm's Way. Sharon Freeman Clevenger, Laurence Miller, Bret Moore, and Arthur Freeman return with this dynamic handbook ideal for law enforcement agencies interested in the psychological health of their officers. Contributors include law enforcement officers with diverse experiences, making this handbook accessible to readers from law enforcement backgrounds. This authoritative, comprehensive, and critical volume on the psychological aspects of police work is a must for anyone affiliated with law enforcement.

The view that academic discourse is, by definition, impersonal has long been superseded. It seems unquestionable now that the interpersonal component of texts, that is, the ways in which the writers project themselves and their audience in the discourse, is an essential factor determining the success of scholarly communication and has become a fundamental issue in the field of English for Academic Purposes (EAP). Interpersonality is the key issue around which the articles in this edited book focus on. The eighteen contributions included in this volume provide a wide exploratory view of the many academic genres in which interpersonal is manifested and the various analytical approaches from which the textual manifestation of that interpersonal can be studied. The varied origin of the contributors is also representative of the global interest that the issue of interpersonal arouses in the field of academic discourse analysis at an international level. The present volume constitutes a highly valuable tool for applied linguists and discourse analysts with an interest in EAP as well as for students, instructors and language teachers interested in academic discourse. The book may also be of interest to other agents intervening in the research publication process, such as translators, proofreaders, reviewers and editors.

In *Constructing the Beginning*, Simon Locke offers a new approach to considering the enigma of creation science, using the perspective of discourse analysis. Using the publications of the British Creation Science Movement to perform a detailed analysis of the creationist case, Locke demonstrates that the discourses and rhetorics used by natural and social scientists are also employed by non-scientists. Out of this study, a view of science as a cultural resource develops, questioning the adequacy of perceived sociological wisdom that sees science as the source and embodiment of cultural "rationalization." As a case study of the use of science as a discursive resource in everyday life, *Constructing the Beginning* speaks to scholars of discourse analysis, constructionism, rhetorics, and the public understanding of science. It will also be of great interest to scholars in the areas of cultural studies, sociology of scientific knowledge and of religion, postmodernism, and sociological theory. Additional Copy Creation science is the target of much attack these days from both within and outside of the orthodox scientific community. This book, however, takes a different approach. It is not an attack on creationism; nor is it a defense. The author's interest is not in creationism at all, but rather, it is in the questions of the role and significance of science in modernity or the public understanding of science. Locke's approach to this issue is a discursive and rhetorical one. Creationism is treated as a case study of the argumentative engagement between science and non-science which--in his view--is as central to the commonsense lifeworld of modernity as

Read Book Constructing Effective Criticism How To Give Receive And Seek Productive And Constructive Criticism In Our Lives

much as it is to the lives of its intellectuals. An important dimension of the public meaning of science in modernity is its limits and its relations with other modes of thought and belief, which continue to survive as discourses in the wider culture. Creationism is merely one example of this general feature. The book begins with a discussion of the current issues in the public understanding of science in relation to traditional sociological views of the impact of science on modernity. This is examined through rationalization and the contrasting view derived from the sociology of scientific knowledge which points to the likelihood of a much more complex and variable relationship than rationalization proposes. It continues with an argument and detailed analysis that focuses on three main points: *the problem of a competing account of reality (the world), in the form of evolution; *the problem of competing accounts of the Bible (the Word), in the form of different versions of Christianity; and *the realization that both of these problems must be managed together in such a way that creationists' own version(s) of the world and of the Word are compatible--a compatibility achieved through a discursive syncretism. The final chapter brings together the strands of the argument to further develop the implications of the dilemma of science for the public understanding of science through the idea of science as a cultural resource and its possible relation to other such cultural resources within modernity--such as Christianity. It is suggested that much so-called "anti-science" could be made sense of in these terms and proposes further research in this direction.

Inspired by the Catholic theologian Hans Küng, this book searches for a model for global ethics by analysing the contemporary philosophical discussion. It demonstrates that the Western model is unable to reckon with exclusivism and difference and presents an alternative model.

Some people just can't take criticism. And some people just can't give it-not in a positive, motivating, mutually beneficial manner, anyway. That's too bad, because criticism is essential to many aspects of business, such as performance appraisals, quality control, and team functioning, to name a few. This empowering book helps readers take the sting out of criticism-and transform it from a destructive, demoralizing disaster into an energizing, educating experience that builds relationships and increases individual and organizational success. Using real-life scenarios and the author's 21 tips to positive criticism, readers will learn to: Think of criticism as a positive thing Become strategic critics and develop their skill in using the power of positive criticism Stay cool, calm, and collected when giving or getting criticism Criticize their boss--without getting fired, and more.

Both human rights and globalization are powerful ideas and processes, capable of transforming the world in profound ways. Notwithstanding their universal claims, however, the processes are constructed, and they draw their power from the specific cultural and political contexts in which they are constructed. Far from bringing about a harmonious cosmopolitan order, they have stimulated conflict and opposition. In the context of globalization, as the idea of human rights has become universal, its meaning has become one more terrain of struggle among groups with their own interests and goals. Part I of this volume looks at political and cultural struggles to control the human rights regime -- that is, the power to construct the universal claims that will prevail in a territory -- with respect to property, the state, the environment, and women. Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran, China, and Hong Kong. Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise.
