Constructivism's central idea is that human learning is constructed, that learners build new knowledge upon the foundation of previous learning. This prior knowledge influences what new or modified knowledge an individual will construct from new learning experiences (Phillips, 1995). Learning is an active process

**Constructivism as a Theory for Teaching and Learning ...**

A constructivist approach to education sees students as active, powerful, capable and competent. It tends to encourage students to learn through 'doing', which helps with engagement, critical thinking, and memory retention.

**What is Constructivism in Education? Piaget's Pros & Cons**

Constructivism is a theory in education that recognizes the learners' understanding and knowledge based on their own experiences prior to entering school. It is associated with various philosophical positions, particularly in epistemology as well as ontology, politics, and ethics.

**Constructivism (philosophy of education) - Wikipedia**

Constructivism in education has roots in Epistemology. The learner has prior knowledge and experiences, which is often determined by their social and cultural environment. Learning is therefore done by students' "constructing" knowledge out of their experiences. While the Behaviorist school of learning may help understand what students are doing, educators also need to know what students are thinking, and how to enrich what students are thinking.

**Constructivism (Philosophy Of Education)**

Constructivism transforms the student from a passive recipient of information to an active participant in the learning process. Always guided by the teacher, students construct their knowledge...

**Constructivism as a Paradigm for Teaching and Learning**

Constructivism emphasizes the active role played by the individual learner in the construction of knowledge, the primacy of social and individual experience in the process of learning, and the realization that the knowledge attained by the learner varies in its accuracy as a representation of an external reality. 3

**EDPE 6224: Constructivism and Education**

Constructivism is an important learning theory that educators use to help their students learn. Constructivism is based on the idea that people actively construct or make their own knowledge, and that reality is determined by your experiences as a learner.

**What Is Constructivism? - WGU**

Education Theory Constructivism and Social Constructivism "Constructivism is the philosophical and scientific position that knowledge arises through a process of active construction." (Mascolo & Fischer, 2005)
