In this thought-provoking read, the authors propose that instead of minimising waste, we should be striving to create value. This is the essence of Cradle to Cradle: waste need not to exist at all.

Cradle-to-Cradle: Remaking the Way We Make Things---

Cradle to Cradle: Remaking the Way We Make Things is a 2002 non-fiction book by German chemist Michael Braungart and US architect William McDonough. It is a manifesto detailing how to achieve their Cradle to Cradle Design model. It calls for a radical change in industry: a switch from a cradle-to-grave pattern to a cradle-to-cradle pattern. It suggests that the "reduce reuse recycle" methods perpetuate this cradle-to-grave strategy, and that more changes need to be made. The book discourages dow

Authors William McDonough and Micheal Braungart use their expertise in chemistry and environmental science to show just how achievable it is. Surely the regulations that our government puts in place make sure corporations are doing their part, right? A tree produces thousands of blossoms in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful, and ...

However, much more impressive is the Cradle to Cradle (C2C) philosophy. Traditional recycling is flawed - instead, we need to change the way we design things. A cradle to grave philosophy is no longer necessary. We have the technology now to make much of our stuff travel in closed loops, being infinitely reused.

Cradle-to-cradle design (also referred to as 2CC2, C2C, cradle 2 cradle, or regenerative design) is a biomimetic approach to the design of products and systems that models human industry on nature's processes, where materials are viewed as nutrients circulating in healthy, safe metabolisms. The term itself is a play on the popular corporate phrase "cradle to grave", implying that the C2C model ...
