With this inspiring and brightly illustrated guide to power, learn about the different types of power, what it means to have power, and what you can do with your own power to create positive change in the world, no matter who or how old you are. What makes you the boss of me? What makes a king a king, or a queen a queen? Why can some people vote for their leaders, but other people can't? Does having lots of money make you powerful? Why are there fewer female scientists, leaders, and artists than men in history books? These are things that kids wonder about. The Power Book answers these and other questions in a relatable way for young people, including thought-provoking discussions on challenging topics, like war, bullying, racism, sexism, and homophobia. You will gain an understanding of your place in your family, your school, and the world, and will discover ways in which you can use your own power to shape the future. As you explore the many aspects of power, thinking points pose questions that spark self-reflection and quotes and stories from some of the greatest change-makers--such as Gandhi, Martin Luther King Jr., Emmeline Pankhurst, Rosa Parks, Malala Yousafzai, and Stephen Hawking--provide historical context and inspiration. Find more opportunities for learning at the back with a glossary of terms and suggestions for further reading. Gain a greater understanding of how power works, then learn how to harness it for good with The Power Book.

The incredible true story of America's original—and forgotten—capital of vice Back in the days before Vegas was big, when the Mob was at its peak and neon lights were but a glimmer on the horizon, a little Southern town styled itself as a premier destination for the American leisure class. Hot Springs, Arkansas was home to healing waters, Art Deco splendor, and America's original national park—as well as horse racing, nearly a dozen illegal casinos, countless backrooms and brothels, and some of the country's most bald-faced criminals. Gangsters, gamblers, and gamines: all once flocked to America's forgotten capital of vice, a place where small-town hustlers and bigtime high-rollers could make their fortunes, and hide from the law. The Vapors is the extraordinary story of three individuals—spanning the golden decades of Hot Springs, from the 1930s through the 1960s—and the lavish casino whose spectacular rise and fall would bring them together before blowing them apart. Hazel Hill was still a young girl when legendary mobster Owney Madden rolled into town in his convertible, fresh off a crime spree in New York. He quickly established himself as the gentleman Godfather of Hot Springs, cutting barroom deals and buying stakes in the clubs at which Hazel made her living—and drank away her sorrows. Owney's protégé was Dane Harris, the son of a Cherokee bootlegger who rose through the town's ranks to become Boss Gambler. It was his idea to build The Vapors, a pleasure palace more spectacular than any the town had ever seen, and an establishment to rival anything on the Vegas Strip or Broadway in sophistication and supercharged glamour. In this riveting work of forgotten history, native Arkansan David Hill plots the trajectory of everything from organized crime to America's fraught racial past, examining how a town synonymous with white gangsters supported a burgeoning black middle class. He reveals how the louche underbelly of the South was also home to veterans hospitals and baseball's spring training grounds, giving rise to everyone from Babe Ruth to President Bill Clinton. Infused with the sights and sounds of America's entertainment heyday—jazz orchestras and auctioneers, slot machines and suited comedians—The Vapors is an arresting glimpse into a bygone era of American vice.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
