This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. A comprehensive, cohesive look at criminal evidence Criminal Evidence provides a comprehensive legal framework of the rules of evidence, highlights key law enforcement issues in the field, and uses current, newsworthy headline cases to illustrate major points and generate student interest. While comprehensive—coverage spans the historical evolution of American jurisprudence from inception to contemporary courts—potentially complicated concepts are presented in a clear, reader-friendly manner. The text is organized to reinforce foundational concepts discussed in introductory courses prior to the presentation of sophisticated legal constructs The Second Edition is completely updated and significantly expanded with nearly 40% more content than the previous edition, five new pedagogical tools per chapter, and the complete text of the Federal Rules of Evidence, Magna Carta, and the Bill of Rights.

A concise and comprehensive introduction to the law of evidence, Criminal Evidence takes an active learning approach to help readers apply evidence law to real-life cases. Bestselling author Matthew Lippman, a professor of criminal law and criminal procedure for over 25 years, creates an engaging and accessible experience for students from a public policy perspective through a multitude of contemporary examples and factual case scenarios that illustrate the application of the law of evidence. Highlighting the theme of a balancing of interests in the law of evidence, readers are asked to apply a more critical examination of the use of evidence in the judicial system. The structure of the criminal justice system and coverage of the criminal investigative process is also introduced to readers.

John Banville's stunning powers of mimicry are brilliantly on display in this engrossing novel, the darkly compelling confession of an improbable murderer. Freddie Montgomery is a highly cultured man, a husband and father living the life of a dissolute exile on a Mediterranean island. When a debt comes due and his wife and child are held as collateral, he returns to Ireland to secure funds. That pursuit leads to murder. And here is his attempt to present evidence, not of his innocence, but of his life, of the events that lead to the murder he committed because he could. Like a hero out of Nabokov or Camus, Montgomery is a chillingly articulate, self-aware, and amoral being, whose humanity is painfully on display.

Discusses the nature of child abuse and the psychologies of the abusive parent and the abused child and describes the procedures for prediction, prevention, and treatment

This text provides a comprehensive legal framework of the rules of evidence, highlights key law enforcement issues in the field, and uses "headline cases" to illustrate major points and generate student interest. Criminal evidence is most often approached from one of two perspectives: legal or law enforcement. This text melds the two perspectives with the aim of providing the most effective and interesting way to present the subject matter. This text presents

potentially complicated concepts in a clear, palatable manner. A key aspect of this text is that it uses current, newsworthy examples; an example is the Louise Woodward case (the murdering Au Pair) discussed in Chapter 2. The text comes with some useful supplements that include PowerPoints, a CD of the most important cases, and a list of videos and websites that are coordinated by chapter and topic. These resources allow an instructor to take an engaging, multi-media approach to the material.

Praise for Martin Limón: “It’s great to have these two mavericks back. . . . Mr. Limón writes with . . . wonderful, bleak humor, edged in pain, about GI life.”—The New York Times Book Review “Limón’s crisp, clear storytelling opens a door to another world and leaves one hoping the next installment won’t be so long in arriving.”—The Baltimore Sun “Limón has the military lingo and ambience down to a T. Plot, pacing, and plausibility are just about perfect.”—The Philadelphia Inquirer (editor’s choice) “As usual, Limón paints a picture of Korea in the mid-1970s that is so detailed and richly atmospheric that the reader’s senses are flooded with the sounds, smells, and tastes of the place. Fans of the Sueño-Bascom series, who have been waiting eagerly for a new novel, can relax. It was well worth the wait.”—Booklist (starred review) The only female MP assigned to a base in the DMZ is missing. Has she been abducted, killed, or, possibly, gone AWOL? Eighth Army cops George Sueño and Ernie Bascom, sent to find her, discover a murder that has been concealed, rampant black marketeering and corruption, crooked officers, rioting Korean civilians, and the wandering ghost of a schoolgirl run down by a speeding army truck. It is up to them to right egregious wrongs while being pursued by criminals who want to kill them. Martin Limón is the author of four earlier books in the Sueño-Bascom series. His debut, *Jade Lady Burning*, was a New York Times Notable Book. From the Hardcover edition.

Giving the reader an in-depth understanding of DNA evidence in criminal practice, this text explains in clear language how DNA evidence is obtained and how it can be successfully challenged in court to minimize its impact or even dismiss it completely. Since it first entered the criminal legal practice DNA has become an indispensable tool in fighting crime, as it allows both unambiguous identification of the criminal by traces of biological material left at the crime scene as well as acquitting innocent suspects. This book: outlines the various types of testing used to obtain DNA evidence highlights the weaknesses of DNA testing, presenting and discussing defence strategies for refuting DNA evidence shows how DNA should be treated as just another piece of evidence and how on its own it is often not enough to convict someone of a particular crime. This book is essential reading for students and practitioners of criminal law and practice and forensic science and law.
