Improved card programme control

Electronic data with rich supplier and transaction information helps control spend and enforce card policies without getting in the way of employees.

Smart Data | Royal Bank of Scotland Abstract. The big data sources in smart grid (SG) enable utilities to monitor, control, and manage the energy system effectively, which is also promising to advance the efficiency, reliability, and sustainability of energy usage. However, false data attacks, as a major threat with wide targets and severe impacts, have exposed the SG systems to a large variety of security issues.

Detecting false data attacks using machine
