~~PADI | Dive Essentials~~

There ' s something exciting and mysterious about exploring deeper dive sites while scuba diving. Sometimes it ' s a wreck that attracts you below 18 metres/60 feet, and on wall dives it may be a giant fan or sponge. You want to be confident to dive to depths down to 40 metres/130 feet, you should take the PADI Deep Diver Specialty course.

~~PADI Deep Diver – Andark Diving & Watersports~~

Sign up for a PADI TEC Deep course and dive on Bohol ' s most unique and untouched locations. Few other divers make it to these sites. Each of our PADI TEC DEEP courses can be taken individually or scheduled in one continuous program! The courses can be taught separately or as a combination course.

This is the first book to span the depth between traditional sport diving editions and the complex medical/commercial texts. It provides a balanced view of the fascinations and hazards of deep diving through extensive factual development of its technical chapters.

This full-color, extensively illustrated revision of a highly respected dive manual includes the information necessary to learn open water diving. Timely discussion include ecology and scuba techniques, equipment and safety materials, women's diving issues and concerns, expanded CPR information, air sharing and hand signals.

Proficiency in underwater communication is not only a vital part of scuba diving training, it also makes diving a much more enjoyable and safer experience. Scuba Diving Hand Signals intends to support beginning recreational scuba divers in learning underwater communication via hand signals. More than 240 commonly used gestures are illustrated and grouped into eight categories: Common signals

Problem and emergency signals Training signals Air Pressure and number signals Underwater wildlife signals Environment signals Emotion signals Miscellaneous signals Underwater wildlife signals are accompanied by QR codes that provide access to supplemental online resources.

Thinking of diving below 130ft or just interested to know more about deep diving? Then you may find the information in this book interesting and of value. Want to know the training needed to get certified to dive below 130, 200, 330ft? This book looks at the different training available to get you certified to dive to the depth that you want to go to. What else can I get out of this book? This book gives an overview of some of the effects of diving on the human body, especially long duration and deep diving. The topics covered will give you a broad overview for each one covered, and is a good starting point to broaden your knowledge of deep diving. What topics are covered? * Why people do deep dives * Training needed to dive deeper than 130 feet safely * The mental shift needed to transform from a recreational diver to a survival diver * Handling unforeseen events underwater when you cannot surface immediately * BCD-breathing * Swapping regulators underwater * Caffeine and diving * Smoking and diving * Sugar and diving * Fatty foods and diving * Certain medication and diving * Breast implants and diving * Diving while breast feeding * Effects of oxygen to the brain and body * Isobaric counter diffusion decompression sickness with example calculations to help you understand it on a high level * Depth records * Rebreathers compared to open circuit * Women and diving * Men and diving * Supplements for deep diving * Breathing exercises for deep diving * Common mistakes made in deep diving that can kill you * Handling missed decompression * IWR (in-water recompression) * Liquid breathing * Effects of diving on the body, both long and short term Will I be able to dive to 400ft after reading this book? No. You need hands on training from a qualified instructor to be able to dive below 130ft. This book is also not a training manual for deep diving, but a book that looks at a high level at some of the issues and effects of deep diving. The more knowledge you have, the better equipped you are to handle unforeseen problems and come back alive. To change your diving safely, you will have to change your thinking. Something to think about. Deep diving is an equipment and knowledge intensive sport, that carry greater risk than shallow sports diving. Deep diving is also an expensive sport, and training can run in the thousands of dollars when reaching the Tri-Mix diver level or below. The deeper you go, the higher the risk for things to go wrong. Correct training for deep diving gives you skills to handle a great deal of problems. However, no training can prepare you for every possible thing that can happen. An open mind and new ideas combined with training can save you when it all goes pear shaped. If even just one tip or one idea in this book one day helps to save your life when things go wrong deep down, would it have been worth getting this book? Get Your copy today
