This book shares the compelling story of how a team of visionary educators turned the traditional education system inside out and created a dramatically different approach to schooling that would serve every child. The result is the Re-Inventing Schools Coalition (RISC) Approach to Schooling, a new paradigm in education that can be replicated anywhere, by anyone, for any student, under any set of circumstances.

The second edition of Aboriginal and Torres Strait Islander Education is an essential and important resource for teacher education students.

"Many educators can recite the faults of their schools or universities, but far fewer can recognize and develop existing strengths to benefit a wider audience. Sukhwant Jhaj has crafted a refreshing new look at how imaginative leadership and a shift in perspective can propel institutions to reach at-risk or underrepresented members of their communities. Delivering on the Promise of Democracy pulls back the curtain on seven high-performing universities to reveal which daily decisions, including listening to the community, embracing conflict, and implementing effective strategies through routine, guide administrators in achieving exceptional results. Through in-depth interviews that offer a close look at these seven universities, Jhaj traces a new trajectory for higher education: a call to question a university's effectiveness through its accessibility to the community it serves. Jhaj's book will inspire anybody interested in widening access to education with its call to renew their institution's mission through powerful and effective leadership." This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. When it comes to the hard work of reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by “teachers” they mean legions of teachers working in close collaboration. After all, it’s teachers who design students’ learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students’ lives. Equity by Design is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you’ll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students (including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation “Every student,” Mirko and Katie insist, “deserves the opportunity to be successful

regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability. ” Consider Equity by Design a critical first step forward in providing that all-important opportunity. “ Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve. ” ~Mirko Chardin and Katie Novak
