Diesel engine - Wikipedia

Petrol damages diesel engines because: Diesel acts as a lubricant, helping the fuel pump to do its job. Petrol does the opposite - it increases friction

Read Online Diesel Engine And Petrol

between parts in the diesel engine. The friction isn't good news for your diesel engine. The more petrol that's pumped through the diesel engine, the more damage it'll do.

Read Online Diesel Engine And Petrol

Put the wrong fuel in your car? Here's what to do | The AA

Diesel cars use fuel as a lubrication oil, ensuring engine parts run smoothly to prevent wear and tear. When petrol is added to diesel

Read Online Diesel Engine And Petrol

the mixture acts like a solvent, dissolving the lubricant. Switching on your ignition circulates the mixture and increases friction between components, damaging parts including your fuel lines and pump.
