There is no doubt that electronic marketing has contributed positively in the life of modern societies, mainly the consuming societies. It allowed purchasing of materials cheaply without any limit, and without any restrictions. It also gave the chance to make a free selection and comparison between the prices of goods at the electronic department stores throughout the Internet. All such facilities are given to the consumers in a very short time without causing them to leave their office or home. In addition, the Electronic Marketing has exterminated the monopoly of goods and materials, all such acts of course are for the consumer's benefit. However, in addition to such advantages there are many disadvantages of such type of marketing; the Electronic Marketing has deleted the privacy of the consumer, because all of his movements through the Internet have been divulged and under control, in addition to lack of exclusive security through the Internet. Accordingly, many losses equally occurred to the customer and the merchant due to such acts of hackers who reveal the information and credit cards details. In addition, the Electronic Marketing caused many merchants, agents and monopolists to be vanquished because it gave the chance for direct communications between the producer and the consumer without passing through them; as such, many of such merchants have been yielded away from the way of this new technology. The Electronic Marketing was able to cause an upset down in many concepts and standards of economic science that have existed for so many years. Doors are still open for every new in this assumption and endless world as there are no limits that can stop such human ambition.

Seminar paper from the year 2012 in the subject Business economics - Personnel and Organisation, grade: A, University of Cambridge, language: English, abstract: The application of traditional recruitment techniques do not suffice anymore and are also not well-timed in order to bring in satisfactory pool of competent candidates. Through early-1990s, with the progression associated with online technologies, many have experienced the particular shift for the traditional recruitment techniques to e-recruitment. The web-based recruitment blends software programs as well as infrastructure, in addition to resume repositories which assist the particular clients in their recruitment operations. Internet lookups are actually very popular among the people looking for work. Resumes delivered via the web as well as through e-mail could be scanned to get key phrases, determining essential information, abilities, proficiency, as well as working experience, hence lowering hands-on procession and probable mistakes. This elevates the effectiveness around choosing competent as well as a trustworthy workforce, lowers long term turnover, and recruits completing online documents presumptively use much less resources compared to that that post papers application packages. Companies can access job hunters spanning the planet and usually get far more applications. The process is cheaper for companies and also more expedited. Even though career boards have the ability to deal with extremely high quantities of both people looking for work as well as employers, they tend to not achieve high quality. The systems are not simple and also harmless enough to be made use of by comparatively unskilled end users; they lack a 'personal feel', raise confidentiality, security, authentication, and cheating issues. The systems additionally discriminate against some applicants due to badly developed hiring platforms. Integration of e-recruiting with convectional recruiting may also be challenging and globalization further complicates assessment for applicants across borders.

Recent innovations in the field of information technology and communications are radically changing the way international organizations conduct business. In this competitive environment, having the necessary tools to streamline business transactions and secure digital payments is crucial to business success. Electronic Payment Systems for Competitive Advantage in E-Commerce provides relevant theoretical frameworks and the latest empirical findings on electronic payment systems in the digital marketplace. Focusing on the importance of e-commerce in business development, including the advantages and disadvantages of e-payments, this book is an essential resource for business professionals who want to improve their understanding of the strategic role of e-commerce in all dimensions, as well as for both researchers and students.

This paper provides a discussion on international standards, the ISO series of quality standards and the advantages and disadvantages of using the ISO 9000 standards for engineering and construction (E/C). The information presented was obtained from a study that investigated international standards and the ISO 9000 series of quality standards. The first part of this paper provides information on involvement in international standards development, the effects of international standards on competitiveness, and the advantages and disadvantages of using the ISO 9000 series of quality international standards. The second part contains the results of an extensive survey on international standards of members of the engineering and construction industry.

Academic Paper from the year 2021 in the subject Didactics - E-Learning, grade: 2.2, Canterbury Christ Church University, course: Study Bussines with Foundation BA(HONS), language: English, abstract: This essay discusses the advantages and disadvantages of E-learning in the digital age. Since ancient times, education has been a key factor in the evolution and progress of human society. From the great philosophers of antiquity who shared their knowledge with their disciples in the vast outdoors classrooms through oratorical speeches, from the writings on the clay tablets and writings on the parchments, then in the Middle Ages when the printing houses appeared and learning began from books, is reached as the current time in the age of computers to E-learning.

This book provides relevant theoretical frameworks and the latest empirical findings on electronic payment systems in the digital marketplace, focusing on the importance of e-commerce in business development, including the advantages and disadvantages of e-payments

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

This four-part overview of electronic commerce offers a more thorough and technical view of the subject than many recent books on the subject. The book provides a balance of theories, applications, and hands-on material. Electronic Commerce is divided into four parts: Electronic Commerce Basics, Electronic Commerce Supporting Activities, Implementation and Management Issues in Electronic Commerce, and Appendix and Glossary. The book's chapters begin with introductions of leading companies with significant e-commerce expertise and at least two small case studies. They include 10 or more hands-on exercises, encouraging readers to explore and analyze sites, and a list of key terms and bibliographic citations. They conclude with 25-30 review questions and 6-10 projects for further investigation. Offers a generalist's overview of the field and its major players for people with little or no technical background Every chapter starts with an industry profile and two information boxes, which serve as case studies and point to practical applications Projects and hands-on exercises conclude each chapter

"... remarkable account of the impact of postmodern philosophy on the question of ethics and politics... commendable also for its balanced view of Heidegger's relationship to politics and ethics.... an excellent account of Heidegger's philosophical understanding of technology..." -- Choice This book takes as its point of departure the question of ethics: that values and their pursuit in the West often perpetuate their own worst enemies. At issue are the dangers in the structures and movements of images, values, and ways of knowing that are most intimately a part of our lives.
