Domain Driven Design (DDD) Software is about automating a business process. That business processes being automated is the domain of the software. Is it possible to create complex banking software without good domain knowledge? No, no way. So we've got to consult The bankers "Domain Experts" to explain the domain to us. As they explain the domain to us we can't start coding it. We should start modeling it "Like car manufacturers, remember".

Domain Driven Design (DDD), A quick look | magedfarag

In domain driven design your objective is to create a model of the domain. You need to identify what are the items (objects) you need to accomplish the desired functionalities of your application. You need to identify the relationships among different objects and how they interact among themselves.
