This book addresses the question: why do sound changes happen, when and where they do? Jeremy

Smith discusses the origins of a series of sound changes in English. He relates his arguments to larger questions about the nature of explanation in history and historical linguistics, and examines the interplay between sound change and social change. Drawing on the latest research in linguistics and history he shows how insights in one field illuminate the other. After the opening chapter describing the book's approach and a general theoretical framework for the study of sound-change, the author discusses problems of evidence and considers the nature of phonological processes. He then presents detailed investigations of major sound-changes from three transitional

periods: first, when English emerged as a language distinct from the other West Germanic varieties; secondly, during the transition from Old to Middle English; and thirdly during the time when Middle English evolved into Early Modern English. The book is written with minimal use of jargon and offers clear definitions of complex notions. It will appeal to all serious students of English historical linguistics, from advanced undergraduate to researcher.

enabling students to understand the strengths and weaknesses of each approach and guiding them on undertaking further research. The case studies and exercises guide students in approaching and manipulating empirical data, providing them with hands-on experience of conducting linguistic research. An extensive variety of approaches, from traditional to contemporary, is treated, including generative approaches, historical sociolinguistic and pragmatic approaches, psycholinguistic perspectives, grammaticalization theory, and discourse-based approaches, as well as perspectives on standardization and language variation. Each chapter applies the concepts

discussed to data from the history of English, and a glossary of key terms enables easy navigation and quick cross-referencing. An essential resource for advanced undergraduate and graduate students of the history of English linguistics.

This volume contains a selection of papers presented at the First International Conference on English Historical Dialectology (ICEHD), organized at the University of Bergamo in September 2003. It includes papers on fundamental aspects of English historical dialectology, from Old English to Late Modern English. The papers discuss points in two thematically distinct but related sections, 'Methods' and

'Data'. The volume also includes the transcript of a debate on methodological issues, in which the main themes are the principles of historical investigation of geographical varieties, the new approaches provided by corpus linguistics and computer technology, and the need for greater awareness of textual reliability.

Bess of Hardwick's Letters is the first book-length study of the c. 250 letters to and from the remarkable Elizabethan dynast, matriarch and builder of houses Bess of Hardwick (c. 1527–1608). By surveying the complete correspondence, author Alison Wiggins uncovers the wide range of uses to which Bess put letters:

they were vital to her engagement in the overlapping realms of politics, patronage, business, legal negotiation, news-gathering and domestic life. Much more than a case study of Bess's letters, the discussions of language, handwriting and materiality found here have fundamental implications for the way we approach and read Renaissance letters. Wiggins offers readings which show how Renaissance letters communicated meaning through the interweaving linguistic, palaeographic and material forms, according to socio-historical context and function. The study goes beyond the letters themselves and incorporates a range of historical sources to

situate circumstances of production and reception, which include Account Books, inventories, needlework and textile art and architecture. The study is therefore essential reading for scholars in historical linguistics, historical pragmatics, palaeography and manuscript studies, material culture, English literature and social history.
