This series of explanations and articles breaks down some commonly misunderstood elements of computers and home theater. Explanations are given in a basic, understandable way (without sounding too "techy.") Topics include: digital camera basics, surge protectors and clean power filters, wireless charging and solar power, smart watches, self-driving and electric cars, smart home and home automation, and a couple of articles with general technology advice.

A book with good, sound, practical advice for renewing a troubled marriage and with good explanations on the Bible's position concerning marriage, divorce, and remarriage. What does the Bible have to say about your marriage?

Examples & Explanations for Professional Responsibility, Sixth Edition, is a thorough and comprehensive text that can be used by students as a study aid and by professional responsibility teachers as a class text. It covers the whole field of professional responsibility, focusing not only on the ABA Model Rules, but on the often-complex relationship between the rules and doctrines of agency, tort, contract, evidence, and constitutional law. Beginning with the formation of the attorney-client relationship, the book proceeds through topics including attorneys' fees, malpractice and ineffective assistance of counsel, confidentiality and privilege

rules, conflicts of interest, witness perjury and litigation misconduct, advertising and solicitation, admission to practice, and the organization of the legal profession. Coverage includes all subjects that are tested on the Multistate Professional Responsibility Exam (MPRE), including: A chapter on judicial ethics, a subject tested on the MPRE and not often covered thoroughly, if at all, in law school professional responsibility courses. Updated discussion and examples based on recent developments in the law, including the ABA's simplification of the rules on advertising and solicitation, new Model Rule 8.4(g) on discrimination in the practice of law, the California Supreme Court's Sheppard Mullin opinion on advance waivers of conflicts, and continuing developments in the impact of technology on the practice of law. More MPRE-style multiple-choice questions in the Examples. New to the Sixth Edition: Revised and updated to reflect recent developments in the law having to do with lawyering, including new ABA rules, ethics opinions, and cases. New and revised examples and explanations in many chapters. Professors and students will benefit from: Comprehensive, updated coverage of all areas of professional responsibility, with attention to areas that are particularly challenging for students (as well as many practicing lawyers!), such as conflicts of interest and privilege and confidentiality. A study aid that without "teaching to the test," provides students with thorough preparation for the MPRE, which is the first licensing exam that many law students take.

"Study guide audience: Law school students taking criminal law courses"--

First Published in 1986. Routledge is an imprint of Taylor & Francis, an informa company.

People have always tried to explain whatever they want to talk about or have to deal with in their worlds. To explain something to oneself or to others makes it comprehensible. If the explanation becomes socially tenable, it provides a person or a tribe with a perspective on their world, a way of knowing it. That perspective becomes their reality. It is a virtual reality, created by people for the use of those people. Virtual realities are products of our talk and our minds, which archive and channel the meaning of things. First, our minds get created, and then our minds create us personally and collectively. All human worlds (that we know anything about) function as they do based upon the meaning of their worlds and them in it. Most of the other animals on earth don't have much to say about their pasts or their future. People do because they invented the concept of the past and the concept of the future in order to think and talk about them. Those who superseded us in our particular cultures invented explanations to give

Get Free Explanations And Advice For The Tech Illiterate Volume Ii

virtual reality to everything they wanted to talk about or do something about. We live in and through those explanations, as we understand them. We invent our explanations on top of those we inherit, and that we and our progenies will grow up living in and through. This counter-intuitive premise is that we do not live in any natural world. We live consciously (and even subconsciously) in our worlds as we have explained them or could explain them. Physiological or biological events certainly do occur. But we deal with them according to what they meant to us. Random events like accidents do occur. But we can explain them before they occur and after they occur. There is nothing that occurs in our worlds that we cannot explain or justify in some way. Whether or not it rains is something we do not control. But to talk about it or think about it, we have to do so in and through our explanations. Your lover may be dumping you for his or her own a priori explanations. How you deal with it depends upon how you explain it to yourself. We live and we die in accordance with our explanations of our worlds and of us in them. We live our explanations.
