Exploring the History of Telemedicine (& the Future) Health /
By Jamie Greenberger. Telemedicine was first conceived as
early as 1879, when rudimentary developments in the
telephone and radio introduced the idea of delivering health
care over cables. (Learn More) One of the pioneers of this
era was Hugo Gernsback, who created the first prototype for
what we might recognize as a telemedical device.

The History of Medicine

The history of medicine shows how societies have changed in their approach to illness and disease from ancient times to the present. Early medical traditions include those of Babylon, China, Egypt and India. Sushruta, from India, introduced the concepts of medical diagnosis and prognosis.
